# **Manufacturing of Groundnut Oil Production and Refining**

**Most Profitable Food  
Processing Industry**

# Introduction

Groundnut oil may be a vegetable oil derived from groundnuts. It's conjointly known as groundnut oil. The oil includes a strong peanut flavor and aroma. It's usually utilized in American, Chinese, South Asian and Southeast Asian cuisine, each for general preparation, and within the case of roasted oil, for added flavor.

Groundnut oil, also known as groundnut oil, may be a delicate tasting vegetable oil expressed from groundnut kernels. Groundnut oil is wide utilized in preparation, as well as cooking, basting, and therefore the manufacture of margarines and shortenings. Groundnut oil process method, based on mechanical pressing technology, is mostly grouped into three stages: groundnut seeds preparation, groundnut pressing and rude groundnut oil processing.

## Groundnut Oil Processing

First of all, the groundnut seeds want a thorough cleaning method to remove sand, stalk, plant junk and the other impurities. And so for the post cleaning, the groundnut seeds got to be prepared for pressing that usually involves size reduction of the groundnut seeds by breaking them and so conditioning by adjusting their wet content and temperature, whereas keeping the seeds hot for a period of certain minutes.

Second, the well prepared seeds are conveyed to the screw pressing machine that is that the most popular methodology of [groundnut](#) oil production. The machine's screw heat ironed the groundnut seeds because it moves to advance wherever the space is smaller and smaller. Because of strong friction and high pressure, groundnut oil is ironed out. Besides, because the temperature within the machine's pressing chamber rises, the output rate of groundnut oil also increases. Finally, the fresh groundnut oil seeps out through the small openings in the bottom of the pressing chamber.

**Related Projects: - [Edible Oils Projects](#)**

Third, the fresh rude groundnut oil obtained from the pressing machine is clarified in an exceedingly setting tank and so pumped through the filter press. The filtered crude groundnut oil are going to be pumped to the refinery for three stages of refining: neutralization, bleaching and deodorization.

## **Benefits of Groundnut Oil**

- Improves Insulin Sensitivity
- Helps in Hair Growth
- Lowers the Signs of Ageing
- Prevents Arthritis
- Lowers the Risk of Cancer
- Groundnut oil is a great source of vitamin E.
- Hydrates the Lips
- Prevents Acne
- Keeps Blood Pressure Levels under Control
- Improves Blood Circulation
- No Cholesterol
- Characteristic Antioxidant Content
- Cooking With Groundnut Oil
- Groundnut Oil is high in Vitamin E

## How to Start a Groundnut Oil Processing Business?

Cooking oil is an important and essential item in the FMCG sector. An average Indian consumes 15 Kg of oil in a year. Compared to other oils like sunflower oil, cottonseed oil, and soy oil, groundnut oil has more nutritional value. In addition to cooking, groundnut oil is used in the [bakery](#) and confectionery industry. Groundnut oil is used in [soaps](#), salad oils, mayonnaise, etc. Groundnut oil is expensive compared to other oils. It has more vitamins, minerals, nutritional value and low levels of cholesterol. It is also suitable [edible](#) oil for Indian cooking.

In India, groundnut is cultivated in 5.8 million hectares. Gujarat is the highest producer of groundnut oil in India. Groundnut seed contains 50-55% of the oil. It is one of the best oil seeds to extract oil from.

# Groundnut Oil Production License & Registration

In establishing a groundnut oil production unit, you will need to obtain several different license and registration from different Government authority.

## Company Registration with ROC

- Trade License
- SSI Registration
- Factory License
- Food Operator License
- BIS Certification
- 'No Objection' from Pollution Control Board
- AGMARK Certification
- Fire License

The Food Standards and Safety Rules, 2011, and rules made under IS 544: 1968 permit additions of antioxidants in groundnut oil for a higher shelf life of the oil. However, under the scheme of labeling of environment-friendly products, the presence of antioxidants within a prescribed limit is a requirement as per notification of the Ministry of Environment and Forests. These are the common license and certification requirement. Check with your local DIC authority about any other required formalities.

# GROUNDNUT OIL PRODUCTION PROCESS

Over 85% of the oil from the seed is extracted using the mechanical press. Groundnut undergoes many processes to produce most of its oil content. Following is the groundnut oil extraction process:

Storage → Cleaning → Dehulling → grinding or rolling → Heating → Pressing → Refining → Packaging.

## **1. Cleaning:-**

Clean the ground nuts properly to remove, dirt, sand, and spoilt seeds. Use dry screening to remove all over or undersized seeds.

## **2. Dehulling:-**

The outer seed coat of groundnut is removed by a power-operated dehuller. Outer seed coat does not contain oil and hence is removed to avoid junk in oil cake.

## **3. Grinding or rolling:-**

Oil extraction is maximum with smaller particles. Grinding reduces the seed size. Rolling the seeds produces flakes. Large oil mills might use both grinding and rolling to extract maximum oil.

## **4. Heating:-**

Heating increases oil yield. It kills the enzymes that deteriorate oil quality.

## 5. Pressing:-

Pressing the processed seeds using a lever press, mechanical expeller or hydraulic press separates the oil.

## 6. Refining:-

The extracted oil is further refined to remove dust or dirt. Refining adds great value to the oil.

**Related Projects:- [Edible Oils, Non Edible Oils, Fats, Vegetable Fats and Oils, Corn Oil, Cooking Oils, Rice Bran Oil, Castor Oil, Sesame Oil, Linseed Oil, Vanaspati Ghee Projects](#)**

## **Export Analysis for Groundnut Oil**

Groundnut Oil is traded all around the world. The data provided on the export analysis shows that there are almost 81 countries and territories, which actively import Groundnut Oil from [India](#). The combined value of total export is 56.47 USD million. Therefore, if any exporter wishes to export Groundnut Oil then Connect2India offers a complete guide on how to export Groundnut Oil from India.

### **The top five countries to export Groundnut Oil from India**

From the perspective of the data on Groundnut Oil [export](#), India's top 5 trade partners who import Groundnut Oil from Indian exporters are mentioned in the table, although the total export value of the top 5 countries is 42.54 USD million which is the 75.33% of the total export value of Groundnut Oil.

**The Map Clearly Shows the Regions Where Groundnut Oil is Majorly Exported.**

Top countries for Groundnut Oil export from India

Country	Value (USD Million)
Viet Nam	23.23
USA	7.66
Nepal	5.39
Thailand	3.78
Malaysia	2.48

## Top Global Markets to Export Groundnut Oil from India in 2019-20

During the year 2019-20, Indian exporters nearly exported 56.47 USD Million of Groundnut Oil to the top global markets. India's Groundnut Oil export volume to Viet Nam is around 130611080, which holds the top position with the share of 62.2% of the total quantity. With the quantity of 5806570, USA takes runner up position in the global importers of Groundnut Oil. The total quantity of Groundnut Oil export to the top 5 countries is 179922530.

**There are many countries which import Groundnut Oil from India, although following are the top global markets for Groundnut Oil exporters:-**

S.NO.	Country	Quantity of export	export value of Groundnut Oil
1	export Groundnut Oil from India to Viet Nam	130611080	23.23
2	export Groundnut Oil from India to USA	5806570	7.66
3	export Groundnut Oil from India to Nepal	26734070	5.39
4	export Groundnut Oil from India to Thailand	14892530	3.78
5	export Groundnut Oil from India to Malaysia	1878280	2.48
6	export Groundnut Oil from India to TAIWAN	4697570	1.62
7	export Groundnut Oil from India to New Zealand	814610	1.32
8	export Groundnut Oil from India to Bhutan	3885570	1.21
9	export Groundnut Oil from India to Cambodia	5418000	1.21
10	export Groundnut Oil from India to Australia	750010	1.2

# Market Outlook

The groundnut oil exhibits no distinctive functionality in comparison with alternative vegetable oils, the worldwide demand for the oil is foreseen to remain stagnant. The groundnut market is very packed with a great degree of competition among key players. Furthermore, high product worth and also the emergence of vegetable oil adds to the factors influencing the decline of the worldwide oil market. Provision problems as a results of nation-wide internment and travel restrictions because of the [COVID-19](#) global crisis is anticipated to impact the availability of raw and processed material. On the opposite hand, nutty flavor and a relatively healthier choice are the key properties anticipated to accelerate the demand for groundnut oil.

Increasing use of groundnut oil in [cosmetics](#) are going to be one in all the primary drivers of the peanut oil market. The abrasive, volatizing, and cleansing properties of hot-pressed groundnut oil and its derivatives are boosting its application in BPC product and [cosmetics](#), such as moisturizers and skin cleansers.

Growing popularity of blended oil are going to be one in all the critical peanut oil market trends. The utilization of cheap alternatives, similar to [vegetable](#) oil in blended oil makes it more affordable than conventional oil. These advantages can boost the popularity of homogenized peanut oil and consequently fuel the growth of the [peanut](#) oil market.

Increasing health concerns among the population because of the growing prevalence of chronic diseases similar to heart problems, blood pressure etc., across the world is anticipated to drive revenue growth of the market over the forecast period. Additionally, rising population, growing income level on healthy modus vivendi, increasing awareness relating to the health benefit of oil, dynamical consumption habits, changing client preference, are some factors anticipated to propel growth of the worldwide groundnut oil market. The increasing use of oil for medicinal functions and skin care product are some factors expected to spice up the growth of the target market within the near future.

However, the high production cost of peanut oil is a major factor expected to restraint growth of the target market in the near future. In addition, high consumption of peanut oil results in various side effects in human health which is one of the major factors expected to hamper growth of the target market to a certain extent. Global peanut oil market is set to witness a steady CAGR of 4.25% in the forecast period of 2019- 2026.

Groundnut oil is an all-purpose oil made from [peanuts](#). It is generally used for its 'nutty' flavor and taste. The oil is suitable for all types of cooking- frying, grilling and seasoning. Studies have shown that groundnut oil is just as effective in protecting against heart disease, as is olive oil. This is because it has similar properties and a similar fatty acid composition, as does olive oils. India is rated as the third largest producer of groundnut in the world with annual production of over 5-6 million tons. [Gujarat](#), [Andhra Pradesh](#), [Tamil Nadu](#) and [Karnataka](#) are the leading producers in the country and accounts for nearly 75% of the total output. Groundnut contributes to nearly 25% of total oil seed production in the country.

## The Peanut Oil is Segmented On the Basis of Type, Application, and Packaging.

On the basis of type, the market is segmented into refined and unrefined peanut oil. The refined oil is refined through bleaching and deodorization. This process essentially removes the components that might cause peanut-based allergies thereby making refined [peanut](#) oil, non-allergic. The high smoke point offered by refined [peanut](#) oil makes it an attractive frying oil for hotels and restaurants. Unrefined [peanut](#) oil offers the nutty taste of peanuts and is, therefore, an ideal choice for salad dressings.

On the basis of application, the market is segmented into [food](#), personal care products, [pharmaceutical](#) and others. Food is the dominant segment and is expected to remain so due to the nature of the market.

The increasing interest in incorporating plant-based or natural solutions into daily products is an important driving factor for the personal care products segment. In the personal care products segment, [peanut](#) oil finds application in several categories such as skin and baby care products. Peanut oil is also used in a wide range of [pharmaceutical](#) products such as weight loss, cholesterol-lowering, cardiac and constipation drugs.

On the basis of [packaging](#), the market is segmented into plastic bottles and containers, glass containers, plastic pouches, and cartons. Convenience, cost and shelf life are important parameters to gauge the performance of any kind of [packaging](#) method. The plastic bottles and containers and [plastic](#) pouches are important and dominant segments due to their particular applicability in preparing food products.

# Reasons for Buying our Report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

# Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

# **Scope of the Report**

**The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Groundnut Oil Production and Refining.” provides an insight into Groundnut Oil Production and Refining market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Groundnut Oil Production and Refining project. The report assesses the market sizing and growth of the Indian Groundnut Oil Production and Refining Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:**

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

**We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Groundnut Oil Production and Refining sector in India along with its business prospects. Through this report we have identified Groundnut Oil Production and Refining project as a lucrative investment avenue.**
