Introduction

Mayonnaise is a cold, emulsification which finds application as sauce or condiment in the food market. This condiment sauce stepped out from its French-Spanish origin and received acceptance worldwide. The standard mayonnaise sauce is made out of a perfect blend of oil in water or other liquid such as vinegar with egg yolk which acts as the emulsifying agent to produce mayonnaise. Egg yolk contains an abundance of lecithin, which is a phospholipid present in egg yolk. This lecithin makes the egg yolk an emulsifying agent. Thus the authentic mayonnaise cannot be produced without egg. However, eggless mayonnaise sauce is also available globally and is being widely accepted among the vegan consumers.

The eggless mayonnaise sauce which is semi stable or semi- emulsified mayonnaise sauce is produced by replacing egg yolk with other vegan ingredients such as mustard, lime, garlic, roasted eggplant or other vegan ingredients.

Mayonnaise - thick white to yellowish creamy sauce or dressing - differs from regular salad dressing as the latter does not egg yolks and tastes sweeter. Mayonnaise is made of a mix of ingredients which are egg yolks, oil, lemon juice or vinegar in addition to seasonings. It is served with meals and applied in sandwiches and burgers and with salads, for example. Additionally, mayonnaise can be used in preparing other sorts of salads dressings.

Mayonnaise is used as an emulsifier in the food industry. It is a thick and creamy dressing used as a condiment on various cuisines. The standard mayonnaise is a stable emulsion of oil, egg yolk, and either lemon juice or vinegar with many other herbs and spices. Egg-free alternatives are also available in market for vegans and those allergic to eggs. Moreover, most of the fat present in the condiment is unsaturated or good fat as the edible oils used come from plant sources and they are potential source of antioxidant vitamins, which is attracting health conscious population. Additionally, increasing consumption of mayonnaise in different cuisines is driving the growth of the global mayonnaise market.

Mayonnaise is a thick, creamy sauce or dressing that is made from oil, egg yolks, vinegar, and various seasonings. Increasing consumption of sauces and dressings is driving the mayonnaise market. Growing working population and increasing trend of convenience foods are likely to boost the growth of the mayonnaise market.

It is used as an emulsifier in the food industry. It is a thick and creamy dressing used as a condiment on various cuisines. The global mayonnaise market is mainly driven by rising demand for convenience foods and increasing application of mayonnaise for salad dressing. Introduction of various mayonnaise products made from different ingredients is gaining attention of consumers.

Rising demand of egg-free spread among the vegans is projected further boost the growth of the mayonnaise market. Moreover, inclination of consumers towards plant-based products is adding fuel to the demand. Additionally, availability of mayonnaise in small and convenient packs have supported the growth of mayonnaise market. However, intense competition among the key players may hamper the new entrants in the market.

Mayonnaise and Salad dressing market is predicted to increase at a CAGR of more than 20% over next six years. Fun Foods, Cremica, Del Monte, Sil, Kraft and American Garden are the major players operating in the market. Eggless mayonnaise dominates the mayonnaise market whereas Fun Foods is the leading player from many decades. Metro cities of India account for a considerable market share in the sales of mayonnaise and salad dressing products, with various variants specifically growing rapidly among upper middle class consumers. Mayonnaise is an integral ingredient which is used by many branded food chains like Macdonald, Subway, KFC, Dominos, Pizza Hut, etc. and these are the leading end users for the mayonnaise market.

India Mayonnaise & Salad Dressing Market is projected to grow by 2021 due to growing trend of international food, awareness, increasing disposable income, and growing demand in middle class people and rising number of international food chains in the country. The unorganized players in this industry are lagging behind as compared to organized players as institutional food players focus more on quality rather than prices. Hence, they consume only branded mayonnaise and salad dressing products.

Mayonnaise made from eggs is dominating the market whereas, mayonnaise made from eggless raw material is expected to grow at a substantial rate. On the basis of specialty food type, the mayonnaise market is segmented into gluten-free, kosher, organic, vegan, GMO-free, and others. Growing inclination of consumers towards plant-based products is boosting the demand for organic mayonnaise segment

Mayonnaise market is segmented on the basis of raw material such as egg, eggless, and others. Mayonnaise made from eggs is dominating the market whereas, mayonnaise made from eggless raw material is expected to grow at a substantial rate.

On the basis of specialty food type, the mayonnaise market is segmented into gluten-free, kosher, organic, vegan, GMO- free, and others. Growing inclination of consumers towards plant-based products is boosting the demand for organic mayonnaise segment.

Based on the packaging, mayonnaise market is segmented into bottles, sachets, jar, and others. Among all, bottles packaging is dominating the market, whereas sachets are expected to grow at a higher rate in the coming years.

On the basis of distribution channel, mayonnaise market is segmented into store based and non-store based. Store based distribution channel is dominating the market based on one stop shopping experience.

Reasons for Buying our Report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Mayonnaise.” provides an insight into Mayonnaise market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Mayonnaise project. The report assesses the market sizing and growth of the Indian Mayonnaise Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Mayonnaise sector in India along with its business prospects. Through this report we have identified Mayonnaise project as a lucrative investment avenue.
