

# Production of Steel Containers (Cargo Containers)

**“ Best Profitable Manufacturing Business Idea in Shipping Industry.”**

# INTRODUCTION

**There are three types of steel containers. New or used shipping containers, converted shipping containers, and purpose-built containers, such as flat packs. What you buy will be determined by what you want to store in it and where you intend to keep it. Steel storage containers are solid and stable, and they are cost-effective.**

**You can expect several years of good service from the right container. They are the most durable of all steel storage containers, since they are designed to withstand wet weather and the weight of other containers stacked on top when being transported overseas.**

**As a result, they are constructed of high-grade steel with a rust-resistant coating, thick floors, and heavy doors with rubber seals and solid locks. On construction sites, shipping containers make excellent storage containers for building materials, plant equipment, and tools.**

**These containers are known as anti-vandal containers because they are difficult to break into or damage. They're also great for storing household furniture, but we suggest using a container that's newer or in excellent condition for this to protect any sensitive items from moisture damage.**

# TYPES OF CONTAINERS:

**Container units are the most important component of the entire shipping, commerce, and transportation industries. These shipping containers are structures that hold various types of goods that must be transported from one location to another using various types of container ships.**

## ***Dry Storage Container:***

**The most widely used shipping container is a dry storage container, which comes in a variety of ISO-standardized dimensions. They come in sizes of 20ft, 40ft, and 10ft and are used to transport dry materials.**

## ***Flat Rack Container:***

**These are simple storage shipping containers with collapsible sides that can be folded to create a flat rack for shipping a wide range of goods.**

## ***Open Top Container:***

**With a convertible top that can be removed entirely to create an open-top, materials of any height can be easily transported.**

## ***Tunnel Container:***

**Tank storage units with doors on both ends of the container are very useful for loading and unloading materials quickly.**

## ***Open Side Storage Container:***

**These storage units have doors that can be converted to fully open sides, allowing for even more space for material loading.**

## ***Double Doors Container:***

**They're a type of storage unit with two doors, allowing for more space for loading and unloading of materials. Steel, iron, and other construction materials are available in regular sizes of 20ft and 40ft.**

## ***Refrigerated ISO Containers:***

**These are temperature-controlled shipping containers that are held at a constant low temperature. They are only used to transport perishable goods such as fruits and vegetables over long distances.**

## ***Insulated Or Thermal Containers:***

**These are shipping storage containers with a temperature control system that allows them to keep a constant temperature. The material selection is made in such a way that they can last a long time without being affected by prolonged exposure to high temperatures. They are well suited for long-distance product transportation.**

## ***Cargo Storage Roll Container:***

**One of the specialised container units made for transporting sets or stacks of materials is a foldable container. They are made of dense, sturdy wire mesh and are equipped with rollers for easy movement. These shipping container units are made a bit more cheerful by the availability of a variety of coloured wire meshes.**

# THE MANUFACTURING PROCESS

**Steel is the basic component of all shipping containers. It is the best option because it is extremely sturdy, malleable, resistant to corrosion, and simple to maintain. It's also a lot less heavy than iron. Steel goes through a number of steps before it can be used as a shipping container. Other materials include aluminium and fiber-reinforced polymers.**

## ***Step 1: Cutting the Steel***

**The production process begins with the unrolling of massive steel rolls. Cutting the roll into many pre-measured sheets with perfect precision is made possible by technologically advanced machinery that uses laser technology. To achieve the desired corrugated effect on the sheets, a metal stamping method is used.**

## ***Step 2: The Cleaning Process:***

**The steel sheet takes shape and size after the initial process. However, it must be prepared for the next stages of production. Sandblasting and priming are used to thoroughly clean the sheets. These procedures effectively remove any dirt and grime that has adhered to the metal sheets' surface.**

### ***Step 3: Other components:***

**When the sheets are being made, other critical components that make up the whole container will be manufactured at the same time. Wall and roof panels, floor braces, square tubing, corner frames and posts, and floor frames are among them.**

## ***Step 4: Assembling of all parts:***

**The welding of wall panels, floor braces, and roof panels, among other things, is the first step in the construction process. The top of the wall is then welded to the square tubing, and the floor panels are put together to form the floor frame. The door assembly is then welded to the floor frame after this is completed. The corner assembly, corner posts, and wall panels are then mounted. A Jig is used throughout the assembly process to ensure straight and accurate fitting.**

## ***Step 5: Fixing the door panel:***

**Many of the joints are welded into place after the door frame is mounted. The door bar is attached to this robust framework, and the doors are secured to the floor frame. Finally, the container's wall and roof panels are welded together to complete the frame.**

# **INDIA SET TO BOOST CONTAINERS MANUFACTURING:**

**In the years leading up to the COVID saga, India's trade increased dramatically. The Hon'ble Prime Minister's 'Atmanirbhar Bharat' or 'Self-Reliant India' initiative resulted in an increase in manufacturing and development activities under the 'Make In India' scheme, improving India's containerized exports. The country currently has about 1.5 million containers at its disposal, but this number falls well short of the new supply-demand gap.**

**As a result, India stands at the crossroads of a golden opportunity to emerge as a major supplier of shipping containers for both itself and the rest of the world, in order to sustain its ambitious ambitions for a \$5 trillion economy and to alleviate the ongoing container shortage. India has a large number of shipyards that, instead of sitting idle, could be used to produce containers. Indian steel companies are already preparing to take advantage of this opportunity to enter the market and begin production.**

**Domestic involvement and government support will potentially lower the cost of obtaining containers from other countries, such as China, which produces around 90% of all shipping containers in the world. The Indian government was swift to recognize this gap and, with the aid of the Ministry of Ports, Shipping and Waterways, has already formed a committee to investigate the feasibility of manufacturing containers in Bhavnagar, Gujarat; a pilot project that has already begun.**

**The global shipping container industry was worth \$8.70 billion in 2019 and is expected to hit \$12.08 billion by 2027, with a CAGR of 4.3 percent between 2020 and 2027. A shipping container is a sturdy container that can withstand transportation, storage, and handling. These containers vary in size from large reusable steel boxes for intermodal shipments to the popular corrugated boxes.**

**Containers are a way of bundling freight and goods into large unitized loads that can be quickly handled, transported, and stacked in a ship or yard, similar to cardboard boxes and pallets. Aluminum and steel are the most common materials used. Each container's size and classification are in accordance with the International Organization for Standardization's standards and regulations (ISO). Container size, product type, end use, and area are all segments of the global shipping container industry.**

**The shipping container industry is divided into three categories based on container size: small containers (20 feet), large containers (40 feet), and high cube containers (40 feet). Dry storage containers, flat rack containers, refrigerated containers, special purpose containers, and others are the different product types. Food and beverages, consumer goods, healthcare, manufacturing equipment, vehicle transportation, and others are the end-use categories. It is divided into four regions: North America, Europe, Asia-Pacific, and LAMEA.**

**18. What are the Personnel (Manpower) Requirements for setting up Steel containers (Cargo Containers) Manufacturing Business?**

**19. What are Statistics of Import & Export for Steel containers (Cargo Containers)?**

**20. What is the time required to break-even of Steel containers (Cargo Containers) Manufacturing Business?**

**21. What is the Break-Even Analysis of Steel containers (Cargo Containers) Manufacturing plant?**

**22. What are the Project financials of Steel containers (Cargo Containers) Manufacturing Business?**

- 23. What are the Profitability Ratios of Steel containers (Cargo Containers) Manufacturing Project?**
- 24. What is the Sensitivity Analysis-Price/Volume of Steel containers (Cargo Containers) Manufacturing plant?**
- 25. What are the Projected Pay-Back Period and IRR of Steel containers (Cargo Containers) Manufacturing plant?**
- 26. What is the Process Flow Sheet Diagram of Steel containers (Cargo Containers) Manufacturing project?**

**27. What are the Market Opportunities for setting up Steel containers (Cargo Containers) Manufacturing plant?**

**28. What is the Market Study and Assessment for setting up Steel containers (Cargo Containers) Manufacturing Business?**

**29. What is the Plant Layout for setting up Steel containers (Cargo Containers) Manufacturing Business?**

# Table of Contents of the Project Report

## ➤ **Introduction**

- **Project Introduction**
- **Project Objective and Strategy**
- **Concise History of the Product**
- **Properties**
- **BIS (Bureau of Indian Standards) Provision & Specification**
- **Uses & Applications**

## ➤ **Indian Market Study and Assessment**

- **Current Indian Market Scenario**
- **Present Market Demand and Supply**
- **Estimated Future Market Demand and Forecast**
- **Statistics of Import & Export**
- **Names & Addresses of Existing Units (Present Players)**
- **Market Opportunity**

## ➤ **Raw Material**

- **List of Raw Materials**
- **Properties of Raw Materials**
- **Prescribed Quality of Raw Materials**
- **List of Suppliers and Manufacturers**

## ➤ **Personnel (Manpower) Requirements**

- **Requirement of Staff & Labor (Skilled and Unskilled)**  
**Managerial, Technical, Office Staff and Marketing Personnel**

## ➤ **Plant and Machinery**

- **List of Plant & Machinery**
- **Miscellaneous Items**
- **Appliances & Equipments**
- **Laboratory Equipments & Accessories**
- **Electrification**
- **Electric Load & Water**
- **Maintenance Cost**
- **Sources of Plant & Machinery (Suppliers and Manufacturers)**

## ➤ **Manufacturing Process and Formulations**

- **Process of Manufacture with Formulation**
- **Packaging Required**
- **Process Flow Sheet Diagram**

## ➤ **Infrastructure and Utilities**

- **Project Location**
- **Requirement of Land Area**
- **Rates of the Land**
- **Built Up Area**
- **Construction Schedule**
- **Plant Layout and Requirement of Utilities**

- **Annexure 32 :: Depreciation Charges - as per IT Act WDV (P & M)**
- **Annexure 33 :: Interest and Repayment - Term Loans**
- **Annexure 34 :: Tax on Profits**
- **Annexure 35 :: Projected Pay-Back Period and IRR**

## Reasons for Buying our Report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

**The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Steel containers (Cargo Containers).” provides an insight into Steel containers (Cargo Containers) market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Steel containers (Cargo Containers) project. The report assesses the market sizing and growth of the Indian Steel containers (Cargo Containers) Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:**

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

**We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Steel containers (Cargo Containers) sector in India along with its business prospects. Through this report we have identified Steel containers (Cargo Containers) project as a lucrative investment avenue.**

## **Select and Choose the Right Business Startup for You**

### **(Instant Online Project Identification and Selection)**

**Finding the right startup business is one of the most popular subject today. Starting a business is no easy endeavor, but the time, effort, and challenges can be worth it if you succeed. To give yourself the best chance to be successful, take your time to carefully find the right business for you. We, at NPCCS, endeavor to make business selection a simple and convenient step for any entrepreneur/startup. Our expert team, by capitalizing on its dexterity and decade's long experience in the field, has created a list of profitable ventures for entrepreneurs who wish to diversify or venture. The list so mentioned is updated regularly to give you a regular dose of new emerging opportunities.**

**NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.**

**Our Market Survey cum Detailed Techno Economic Feasibility Report provides an insight of market in India. The report assesses the market sizing and growth of the Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.**

**And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:**

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

**The detailed project report covers all aspect of business, from analyzing the market, confirming availability of various necessities such as Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule,**

**Working Capital Requirement, uses and applications, Plant Layout, Project Financials, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis. The DPR (Detailed Project Report) is formulated by highly accomplished and experienced consultants and the market research and analysis are supported by a panel of experts and digitalized data bank.**

**We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in India along with its business prospects.....[Read more](#)**

# **NIIR PROJECT CONSULTANCY SERVICES**

**AN ISO 9001: 2015 CERTIFIED COMPANY**

# ABOUT US

- *One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services*
- *We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients' in India & abroad*

*We at NPCS want to grow with you by providing solutions scale to suit your new operations and help you reduce risk and give a high return on application investments. We have successfully achieved top-notch quality standards with a high level of customer appreciation resulting in long lasting relation and large amount of referral work through technological breakthrough and innovative concepts. A large number of our Indian, Overseas and NRI Clients have appreciated our expertise for excellence which speaks volumes about our commitment and dedication to every client's success.*

# What do we offer?

- *Project Identification*
- *Detailed Project Reports/Pre-feasibility Reports*
- *Market Research Reports*
- *Business Plan*
- *Technology Books and Directory*
- *Industry Trend*
- *Databases on CD-ROM*
- *Laboratory Testing Services*
- *Turnkey Project Consultancy/Solutions*
- *Entrepreneur India (An Industrial Monthly Journal)*

# How are we different ?

- *We have two decades long experience in project consultancy and market research field*
- *We empower our customers with the prerequisite know-how to take sound business decisions*
- *We help catalyze business growth by providing distinctive and profound market analysis*
- *We serve a wide array of customers , from individual entrepreneurs to Corporations and Foreign Investors*
- *We use authentic & reliable sources to ensure business precision*

# Our Approach

**Requirement collection**

**Thorough analysis of the project**

**Economic feasibility study of the Project**

**Market potential survey/research**

**Report Compilation**

- **Public-sector Companies**
- **Corporates**
- **Government Undertakings**
- **Individual Entrepreneurs**
- **NRI's**
- **Foreign Investors**
- **Non-profit Organizations, NBFC's**
- **Educational Institutions**

- **Waste Management & Recycling**
- **Wood & Wood Products**
- **Water Industry(Packaged Drinking Water & Mineral Water)**
- **Wire & Cable**

# MARKET RESEARCH REPORT

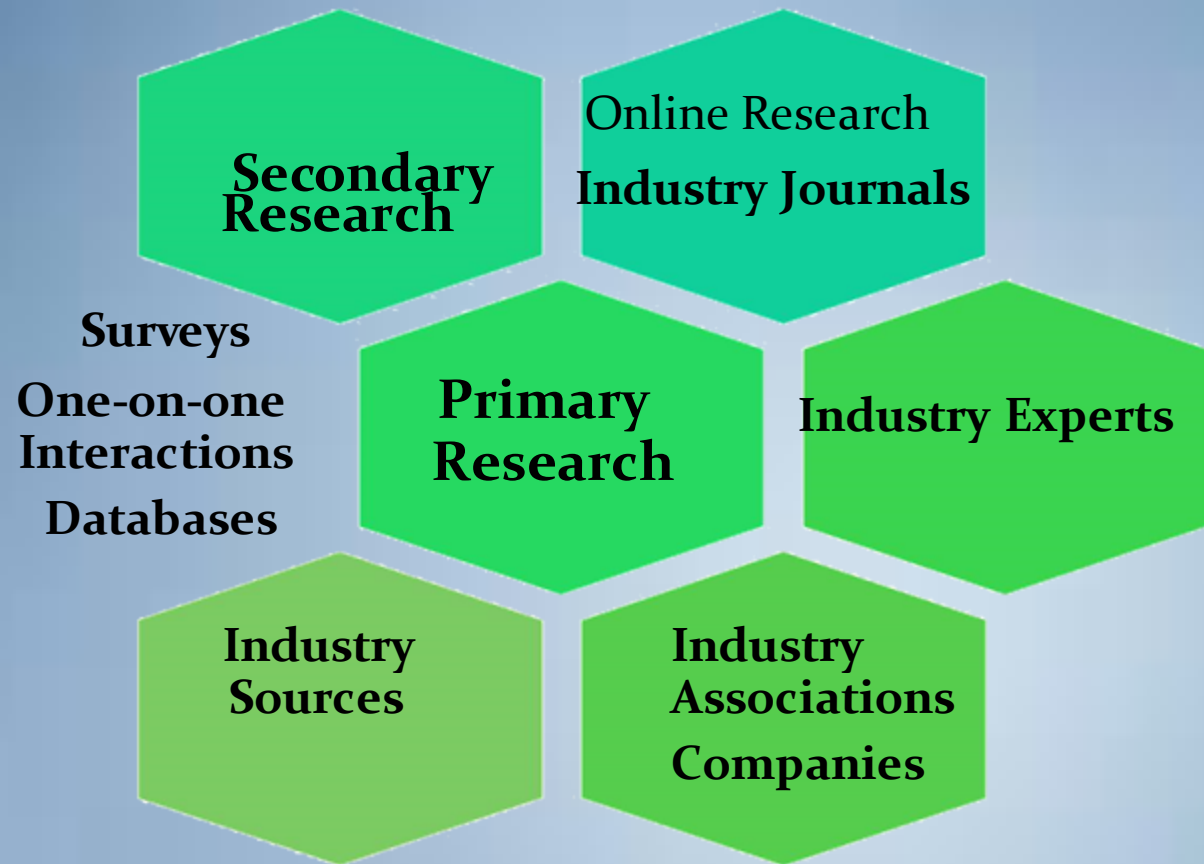

# Objective

- To get a detailed scenario of the industry along with its structure and classification
- To provide a comprehensive analysis of the industry by covering aspects like:
  - Growth drivers of the industry
  - Latest market trends
  - Insights on regulatory framework
  - SWOT Analysis
  - Demand-Supply Situation
  - Foreign Trade
  - Porters 5 Forces Analysis

- **To provide forecasts of key parameters which helps to anticipate the industry performance**
- **To help chart growth trajectory of a business by detailing the factors that affect the industry growth**
- **To help an entrepreneur/manager in keeping abreast with the changes in the industry**
- **To evaluate the competitive landscape of the industry by detailing:**
  - **Key players with their market shares**
  - **Financial comparison of present players**

- **Venturist/Capitalists**
- **Entrepreneur/Companies**
- **Industry Researchers**
- **Investment Funds**
- **Foreign Investors, NRI's**
- **Project Consultants/Chartered Accountants**
- **Banks**
- **Corporates**
