# Introduction

Ready-made garments are mass-produced finished textile products of the clothing industry. They are made from many different fabrics and yarns. Their characteristics depend on the fibers used in their manufacture.

The garments are very simple to manufacture and easily marketable both in urban and rural areas. The demand of readymade garments is increasing day by day due to urbanization of the cities.

Readymade garments are a part of our daily life. Clothes are an epitome of a culture. People in different parts of the world have their own styles of dressing which symbolize their culture and status. The Readymade garments industry is increasing day by day due to changes of fashion in day to day life. The textile industry including readymade garments occupies a unique position in the Indian economy.

Its predominant presence in the Indian economy is manifested in terms of its significant contribution to the industrial production, employment generation and foreign exchange earnings.

The readymade garment industry in India owes its existence to the emergence of a highly profitable market for exports. Ready-made garments account for approximately 45% of India's total textile exports.

It has immense potential for employment generation particularly in the rural and remote areas of the country on account of its close linkage with agriculture. They represent value added and less import sub sector. In the recent years, however, the domestic demand has also been growing rapidly. Thus, due to demand it is a good project for entrepreneurs to invest.

## **Market Outlook**

India's textiles sector is one of the oldest industries in Indian economy dating back several centuries. Even today, textiles sector is one of the largest contributors to India's exports with approximately 15 per cent of total exports. The textiles industry is also labour intensive and is one of the largest employers.

India is the sixth largest supplier of readymade garments in the world with a 3.7 per cent share in global exports.

The textile industry employs about 51 million people directly and 68 million people indirectly. India's overall textile exports during FY 2015-16 stood at US\$ 40 billion.

The Indian textiles industry, currently estimated at around US\$ 120 billion, is expected to reach US\$ 230 billion by 2020.

The Indian Textile Industry contributes approximately 4 per cent to India's Gross Domestic Product (GDP), and 14 per cent to overall Index of Industrial Production (IIP).

- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

# Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

# Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Readymade Garments” provides an insight into the Readymade Garments market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Readymade Garments project. The report assesses the market sizing and growth of the Indian Readymade Garments Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

**We at NPCCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Readymade Garments. sector in India along with its business prospects. Through this report we have identified Readymade Garments project as a lucrative investment avenue.**

# Free Instant Online Project Identification & Selection Search Facility

Selection process starts with the generation of a product idea. In order to select the most promising project, the entrepreneur needs to generate a few ideas about the possible projects.

Here's we offer a best and easiest way for every entrepreneur to searching criteria of projects on our website [www.entrepreneurindia.co](http://www.entrepreneurindia.co) that is "Instant Online Project Identification and Selection"

**NPCS Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify projects based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the projects on the basis of mentioned pointers and identify a suitable project matching your investment requisites.**
