**How to Start Adhesives
Manufacturing Unit.**

**Adhesive from Maize
Starch**

Introduction

Adhesive, any substance that is capable of holding materials together in a functional manner by surface attachment that resists separation.

“Adhesive” as a general term includes cement, mucilage, glue, and paste—terms that are often used interchangeably for any organic material that forms an adhesive bond.

Starch is a polysaccharide carbohydrate. All green plants store starch as energy produced by photosynthesis. The most common form of starch is amylose and amylopectin. Maize (Corn) Starch (C₆H₁₀O₅) is the leading source of starch both for food and for its use in industries.

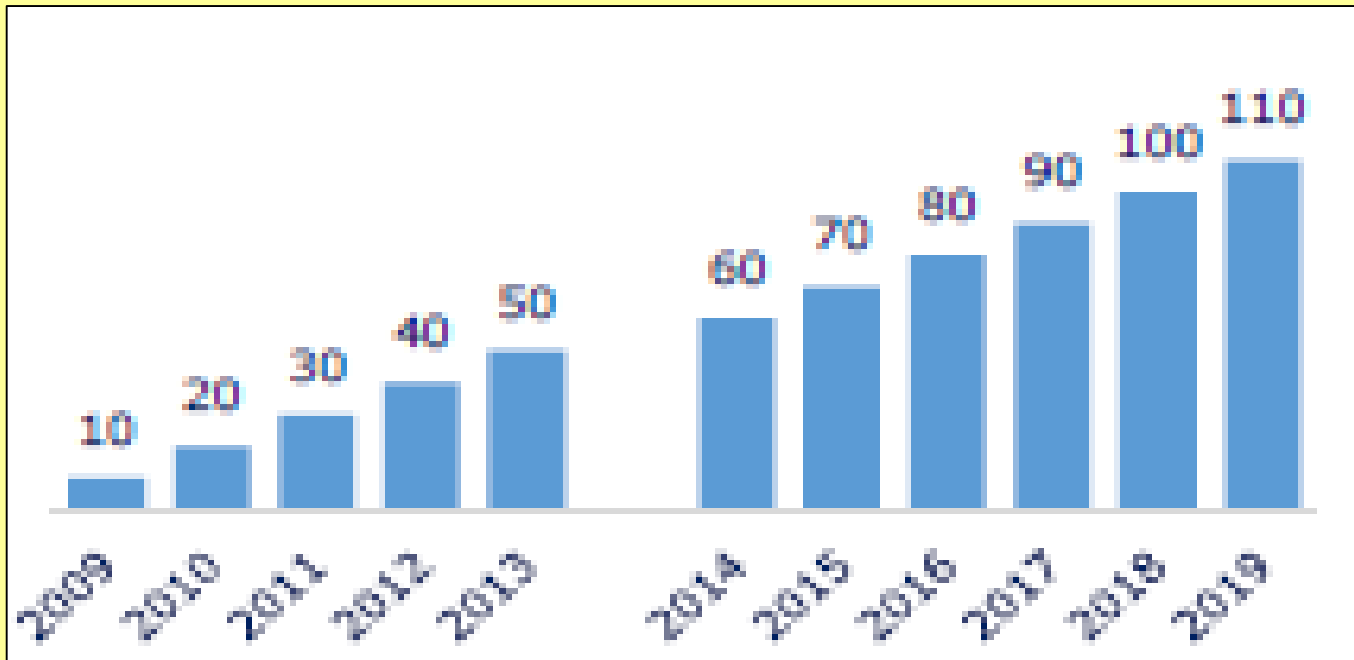

Market outlook

Adhesives are used in almost every manufacturing sector right from flexible packaging to textiles and have gained widespread popularity across sectors, which comprises renewable energy, auto, aviation, construction, FMCG, healthcare and others.

The adhesives & sealants market is expected to grow from USD 49.50 Billion in 2016 to USD 63.50 Billion by 2021, at a CAGR of 5.11% between 2016 and 2021.

Growth in India adhesives market can also be attributed to macroeconomic factors such as increasing population base, rising per capital income and rapid industrialization. Moreover, rising technological advancements have led to development of advanced and hybrid adhesives that have excellent bonding strength and flexibility, under a wide range of temperatures. Rising awareness about different types of adhesives and their applications in various end user industries is projected to boost demand for adhesives in India during 2016-2025.

Reasons for Buying our Report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Adhesive from Maize Starch” provides an insight into the Adhesive from Maize Starch market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Adhesive from Maize Starch project. The report assesses the market sizing and growth of the Indian Adhesive from Maize Starch Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Adhesive from Maize Starch sector in India along with its business prospects. Through this report we have identified Adhesive from Maize Starch project as a lucrative investment avenue.

Free Instant Online Project Identification & Selection Search Facility

Selection process starts with the generation of a product idea. In order to select the most promising project, the entrepreneur needs to generate a few ideas about the possible projects.

Here's we offer a best and easiest way for every entrepreneur to searching criteria of projects on our website www.entrepreneurindia.co that is "Instant Online Project Identification and Selection"

NPCS Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify projects based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the projects on the basis of mentioned pointers and identify a suitable project matching your investment requisites.
