# Dehydrated Fruits & Vegetables

Dehydrated Fruits & Vegetables

(Onion, Garlic, Ginger, Spinach, Jamun, Orange, Guava,

Lemon, Sweet Potato, and Potatoes & Beetroot)

## *Dehydrated Fruits & Vegetables*

**Fruit and vegetable dehydration is one of the oldest ways of food preservation known to man, and it mainly consists of establishments that sun dry or artificially dehydrate fruits and vegetables. While the primary reason for dehydration is food safety, dehydrating fruits and vegetables reduces the cost of packaging, storage, and transportation by reducing the final product's weight and volume. The promise of dehydrated fruits and vegetables is greater than ever, thanks to improvements in dehydrated food quality and a greater emphasis on instant and convenience foods.**

**Dehydration or drying removes biologically active water, halting microorganism development. As a result, the rate of enzyme activity and chemical reactions is slowed. The processing should be achieved in such a way that the fresh material's nutritional value, natural flavour, and characteristic cooking quality are preserved after drying. When kept tightly in the hands, fruits are considered dry if they display no signs of moisture or stickiness. When vegetables become brittle, they are called dry.**

## ***Benefits of Dehydrated Fruits & Vegetables***

**It's never been easier to prevent food dehydration. It's a method that dates back to ancient times, when our forefathers sun-dried seeds, fruits, and even meat to keep them alive during the year while migrating and when food supplies were limited due to seasonal changes. Dehydrated and dried foods are becoming increasingly popular as a healthier, more sustainable, and vitamin-rich food source that is simple to prepare at home and has a long shelf life. Dehydrated foods can help you avoid the added sugars, additives, and preservatives that are commonly found in processed foods.**

**The demand for dried fruits and vegetables is forecast to hit 47.3 billion dollars in 2024, with a CAGR of 7.18 percent. The market is being boosted by the fast-growing packaged food sector and rising demand for ready-to-eat foods. Several factors have contributed to the growth of the demand for dehydrated fruits and vegetables. Over the last few years, the consumption of functional drinks such as nutraceuticals has increased dramatically across the world.**

**The emergence of functional beverages is attributed to a number of factors in both advanced and emerging economies, including rising health issues and evolving consumer lifestyles. Furthermore, the rising demand for Super fruit powder is expected to boost the overall growth of the dehydrated fruits and vegetable industry. Various factors are expected to drive the global dehydrated fruits and vegetables market. Dehydrated fruits and vegetables are growing at a rapid rate, thanks to the huge growth of sports drinks and supplements.**

A white bowl filled with a reddish-brown powder sits on a white surface. In the foreground, several slices of red onion are scattered, some overlapping. The background is a soft, out-of-focus white.

# Dehydrated Onion Powder and Dehydrated Garlic Flakes

**Onion powder is ground onion that has been dehydrated and is widely used as a seasoning. It's a popular component of seasoned salts and spice blends like beau monde seasoning. Toasted onion is used in some of the varieties. You may use white, yellow, or red onions. Onion powder is a commercially processed food with a variety of culinary applications. Dehydration has long been considered one of the most effective methods for preserving food for later use.**

**Dehydration of onions is currently a common trend in which all moisture is stripped from the onion, leaving it fully dry. The most important thing to note about dehydrated onion is that it does not need to be refrigerated. Dehydrated onions are also used as an antiseptic in the treatment of wounds. Garlic flakes are small bits of garlic that have been dehydrated. These garlic flakes are larger than Garlic Powder and are not diluted with salt.**

**They are delicious in curries, casseroles, and other liquid dishes that are cooked long enough for the pieces to soften and release their garlic flavour. Dehydrated garlic flakes are well-known for their pungent flavour and are often used in a variety of dishes. Dry soup mixes, sauces, vegetable mixes, stuffing mixes, and fast foods are all seasoned with these flakes. The flavour and taste of the dehydrated garlic flake are very close to that of fresh garlic.**

## *Benefits of Dehydrated Onion Powder and Dehydrated Garlic Flakes*

**Onion powder can be sprinkled on top of a wide range of foods and dishes, including pasta, pizza, and grilled chicken. It's also a key component of beau monde seasoning. It's also used as a meat rub on occasion. Some commercially prepared foods, such as sauces, soups, and salad dressings, contain onion powder. It can also be used in a variety of other dishes, including burgers and meatloaf. Since it contains certain nutrients, but in small amounts, using onion powder in different recipes has health benefits.**

**Vitamin C is another active medical ingredient found in onions. Vitamin C is used as a tonic and for rotting clokinin, which aids in blood sugar regulation and serves as insulin. Sulphur, vitamins, and iron are all found in onions. Prebiotics found in dehydrated onion powder help people sleep better and even reduce stress. When prebiotic fibre is digested by gut bacteria, it allows them to multiply and boost gut health while also releasing metabolic by-products.**

**Garlic can also aid with heart problems such as high blood pressure, high cholesterol, coronary heart disease, heart attack, and “arteritic hardening.” Garlic is also believed to aid with cardiac problems such as high blood pressure, high cholesterol, coronary heart disease, heart attack, and artery hardening. Dried Garlic Flakes are garlic flakes that have been dehydrated. They are larger than Garlic Granules and are difficult to dilute with salt. To release garlic flavour in liquid dishes, use Garlic Flakes.**

**Between 2020 and 2025, the global Dehydrated Onion Powder Market would grow at a significant pace. Onion powder is low in calories but rich in vitamins C, B, and potassium, among other nutrients. Onion powder contains compounds such as quercetin and sulphur compounds that aid in the reduction of high blood sugar levels. While the global onion powder market is currently much smaller than the global onion market, it is growing at a healthy 5 percent per year.**

**Garlic's popularity is increasing as people become more aware of its health benefits. Furthermore, the growing demand for black garlic is expected to boost the garlic market's growth. Garlic powder, granules, pellets, agglomerated, and other types of dehydrated garlic are available. When compared to fresh garlic, dehydrated garlic has a longer shelf life, making it easier to handle and store. Fresh garlic is used to make dehydrated garlic flakes or dried garlic flakes. Due to the steadily growing global population, the global dehydrated garlic market is expected to expand at a rapid pace.**

# Baking Soda & Baking Powder

## Baking Soda And Baking Powder

**One of the most popular leaveners in baked goods is baking soda. This simple chemical compound, also known as sodium bicarbonate, is present in nature in crystalline form but is ground into a fine powder for cooking purposes. Baking soda is an alkaline compound that produces carbon dioxide gas when mixed with an acid. Tiny carbon dioxide gas bubbles get stuck in the batter, causing it to rise or inflate. Vinegar, lemon juice, buttermilk, yoghurt, and cream of tartar are all common acids that cause this reaction.**

**Baking soda is a powerful ingredient. In reality, it's 3-4 times more powerful than baking powder. In a recipe, more baking soda does not always imply more boost. Baking soda is contained in baking powder. Baking soda, cream of tartar (a dry acid), and sometimes cornstarch are used to make it. The majority of baking powder sold nowadays is double-acting. This suggests that the first leavening happens when baking powder is warm, such as when the dry and wet ingredients of a recipe are combined.**

## *Use of Baking Soda And Baking Powder*

**Baking soda can be used to make cookies, cakes, muffins, and cupcakes, among other baked goods. For good purpose, baking soda is regarded as a versatile commodity. In recipes that do not need the use of acidic ingredients, baking powder is used. Baking powder, for example, reacts with liquid in a basic biscuit recipe that only calls for baking powder, eggs, milk, and flour. In baked goods, baking powder is used as a leavening agent. It can also be used to clean things around the home. If it expires, it simply means the leavening agents will no longer function as well, although it can still be used as baking soda.**

**The market for sodium bicarbonate was valued at USD 1.2 billion in 2018 and is expected to expand at a CAGR of more than 5% from 2019 to 2024. The chemical compound sodium bicarbonate, also known as baking soda or bicarbonate of soda, is made up of a bicarbonate anion and a sodium cation. The chemical formula for it is  $\text{NaHCO}_3$ . With rising demand from personal care products, the sodium bicarbonate market will expand. The rapidly rising food industry and booming textile industry are expected to propel the global sodium bicarbonate market to new heights in the coming years.**

**Baking soda is the common name for sodium bicarbonate. It's a key ingredient in baking and clothing decolorization. The global baking powder market is expected to grow as consumer demand for baked goods rises. The global baking powder market is expected to rise at a healthy rate, thanks to rising demand from bakeries and confectioneries. The business is expected to expand due to changes in people's lifestyles. Baking powder is one of the most important ingredients in cookies, pancakes, waffles, muffins, and other baked goods.**

**The changing prices would have a direct effect on the industry. With rising demand from personal care applications, the sodium bicarbonate market will expand. The market will rise as a result of rising demand for convenience foods around the world as a result of people's busy and fast-paced lifestyles. Phosphate, tartrate, and anhydrous phosphate are all popular baking powder ingredients. The global baking powder market is expected to expand at a rapid pace, owing to a variety of factors.**

## Reasons for Buying Our Report:

- **The report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **The report provides vital information on the product like it's characteristics and segmentation**
- **The report helps you market and place the product correctly by identifying the target customer group of the product**

- **The report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

# **Our Approach**

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

## Free Instant Online Project Identification and Selection Service

**Our Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify projects based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the projects on the basis of mentioned pointers and identify a suitable project matching your investment requisites.....[Read more](#)**

**NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.**

**Our Market Survey cum Detailed Techno Economic Feasibility Report provides an insight of market in India. The report assesses the market sizing and growth of the Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.**

**And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:**

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

**The detailed project report covers all aspect of business, from analyzing the market, confirming availability of various necessities such as Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule,**

**Working Capital Requirement, uses and applications, Plant Layout, Project Financials, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis. The DPR (Detailed Project Report) is formulated by highly accomplished and experienced consultants and the market research and analysis are supported by a panel of experts and digitalized data bank.**

**We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in India along with its business prospects.....[Read more](#)**

# **NIIR PROJECT CONSULTANCY SERVICES**

**AN ISO 9001: 2015 CERTIFIED COMPANY**

## Who are We?

- **One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services**
- **We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients' in India & abroad**

## What do We Offer?

- **Project Identification**
- **Detailed Project Reports/Pre-feasibility Reports**
- **Business Plan**
- **Market Research Reports**
- **Technology Books and Directory**
- **Industry Trend**
- **Databases on CD-ROM**
- **Laboratory Testing Services**
- **Turnkey Project Consultancy/Solutions**
- **Entrepreneur India (An Industrial Monthly Journal)**

## How are We Different ?

- We have two decades long experience in project consultancy and market research field
- We empower our customers with the prerequisite know-how to take sound business decisions
- We help catalyze business growth by providing distinctive and profound market analysis
- We serve a wide array of customers , from individual entrepreneurs to Corporations and Foreign Investors
- We use authentic & reliable sources to ensure business precision

# Our Approach

Requirement collection

Thorough analysis of the project

Economic feasibility study of the Project

Market potential survey/research

Report Compilation

## **Who do we Serve?**

- Public-sector Companies
- Corporates
- Government Undertakings
- Individual Entrepreneurs
- NRI's
- Foreign Investors
- Non-profit Organizations, NBFC's
- Educational Institutions
- Embassies & Consulates
- Consultancies
- Industry / trade associations

## Sectors We Cover

- Ayurvedic And Herbal Medicines, Herbal Cosmetics
- Alcoholic And Non Alcoholic Beverages, Drinks
- Adhesives, Industrial Adhesive, Sealants, Glues, Gum & Resin
- Activated Carbon & Activated Charcoal
- Aluminium And Aluminium Extrusion Profiles & Sections,
- Bio-fertilizers And Biotechnology
- Breakfast Snacks And Cereal Food
- Bicycle Tyres & Tubes, Bicycle Parts, Bicycle Assembling

## **Sectors We Cover** *Cont...*

- Bamboo And Cane Based Projects
- Building Materials And Construction Projects
- Biodegradable & Bioplastic Based Projects
- Chemicals (Organic And Inorganic)
- Confectionery, Bakery/Baking And Other  
Food
- Cereal Processing
- Coconut And Coconut Based Products
- Cold Storage For Fruits & Vegetables
- Coal & Coal Byproduct

## **Sectors We Cover** *Cont...*

- Copper & Copper Based Projects
- Dairy/Milk Processing
- Disinfectants, Pesticides, Insecticides, Mosquito Repellents,
- Electrical, Electronic And Computer based Projects
- Essential Oils, Oils & Fats And Allied
- Engineering Goods
- Fibre Glass & Float Glass
- Fast Moving Consumer Goods
- Food, Bakery, Agro Processing

## **Sectors We Cover** *Cont...*

- Fruits & Vegetables Processing
- Ferro Alloys Based Projects
- Fertilizers & Biofertilizers
- Ginger & Ginger Based Projects
- Herbs And Medicinal Cultivation And Jatropha (Biofuel)
- Hotel & Hospitality Projects
- Hospital Based Projects
- Herbal Based Projects
- Inks, Stationery And Export Industries

## Sectors We Cover

*Cont...*

- Infrastructure Projects
- Jute & Jute Based Products
- Leather And Leather Based Projects
- Leisure & Entertainment Based Projects
- Livestock Farming Of Birds & Animals
- Minerals And Minerals
- Maize Processing(Wet Milling) & Maize Based Projects
- Medical Plastics, Disposables Plastic Syringe, Blood Bags
- Organic Farming, Neem Products Etc.

## Sectors We Cover *Cont...*

- Paints, Pigments, Varnish & Lacquer
- Paper And Paper Board, Paper Recycling Projects
- Printing Inks
- Packaging Based Projects
- Perfumes, Cosmetics And Flavours
- Power Generation Based Projects & Renewable Energy Based Projects
- Pharmaceuticals And Drugs
- Plantations, Farming And Cultivations
- Plastic Film, Plastic Waste And Plastic Compounds
- Plastic, PVC, PET, HDPE, LDPE Etc.

## **Sectors We Cover** *Cont...*

- Potato And Potato Based Projects
- Printing And Packaging
- Real Estate, Leisure And Hospitality
- Rubber And Rubber Products
- Soaps And Detergents
- Stationary Products
- Spices And Snacks Food
- Steel & Steel Products
- Textile Auxiliary And Chemicals

## **Sectors We Cover** *Cont...*

- Township & Residential Complex
- Textiles And Readymade Garments
- Waste Management & Recycling
- Wood & Wood Products
- Water Industry(Packaged Drinking Water & Mineral Water)
- Wire & Cable

# Objective

- ⌘ To get a detailed scenario of the industry along with its structure and classification
- ⌘ To provide a comprehensive analysis of the industry by covering aspects like:
  - ⌘ Growth drivers of the industry
  - ⌘ Latest market trends
  - ⌘ Insights on regulatory framework
  - ⌘ SWOT Analysis
  - ⌘ Demand-Supply Situation
  - ⌘ Foreign Trade
  - ⌘ Porters 5 Forces Analysis

# Objective

- ⌘ To provide forecasts of key parameters which helps to anticipate the industry performance
- ⌘ To help chart growth trajectory of a business by detailing the factors that affect the industry growth
- ⌘ To help an entrepreneur/manager in keeping abreast with the changes in the industry
- ⌘ To evaluate the competitive landscape of the industry by detailing:
  - ⌘ Key players with their market shares
  - ⌘ Financial comparison of present players

# Clientele

- ⌘Venturist/Capitalists
- ⌘Entrepreneur/Companies
- ⌘Industry Researchers
- ⌘Investment Funds
- ⌘Foreign Investors, NRI's
- ⌘Project Consultants/Chartered Accountants
- ⌘Banks
- ⌘Corporates
