**Duplex Paper Board**

**Business Opportunities in Paper Packaging Industry.**

# Introduction

**Duplex Board is a form of paperboard or cardboard that is also known as greyboard due to its grey colour on both sides. Since it is made up of two layers, or plies, it is referred to as duplex board. To offer the board a glossy sheen, the exterior one side is often coated with a bright white look.**

**Duplex coated board with a glossy coated surface on one side for superior printability. Duplex board can be used to make milk cartons, and duplex board containers can be used to hold wines and liquors sold in boxes. For hygiene reasons, duplex board used in the food industry is not made from recycled paper, but waste paper is occasionally used when the board is used for other purposes.**

**Match boxes, book covers, and greeting cards are some of the more popular uses for duplex board. This type of duplex board is light in weight. Duplex board (also known as white corrugated boxes) is a two-layer board with a smooth surface that is commonly used for packaging. The term "duplex board" refers to a type of paperboard or cardboard.**

**Since it is made up of two layers or strands, it is called duplex. Even though the exterior of the board is frequently coated to make it more water-resistant and to give it a polished sheen, the uncoated duplex board is sturdy enough to make disposable containers.**

# Uses of Duplex Paper Board

**Board of two layers These are commonly used to make shoe boxes, cloth boxes, cereal boxes, soap boxes, toothpaste boxes, and a variety of other packaging applications, and are available in white, dark, and white, white duplex boards. Duplex board is widely used in the preparation of fast food and take-out food boxes.**

**Paperboard (duplex) since recycled materials cannot be used for this purpose, they are used in food packaging. Duplex board products are commonly used in industry and are well-known for their consistency and durability. It's typically used to make boxes for a variety of small stock.**

**Match boxes, book covers, and greeting cards are all popular uses for duplex board. This type of duplex board is light in weight. For hygiene reasons, duplex board used in the food industry is not made from recycled paper, but waste paper is occasionally used when the board is used for other purposes.**

# Manufacturing Process

**Duplex board paper's coated surface has a high level of whiteness, smoothness, ink absorption, and printing gloss. At the same time, duplex board paper has a high stiffness and folding durability, and is commonly used in the fields of paper, packaging, and printing.**

**The system has three coating stations that cover two stages of top layer coating and one stage of back side coating, ensuring that the desired properties of Quality Coated Duplex Board are maintained. Blade Coater, the International Standards of Quality Duplex Board, has been added to meet the needs of customers, and can be found in:**

- 1. Optimal appearance**
- 2. A Higher Gloss**
- 3. Improved Surface and Smoothness**
- 4. Improved Printability**
- 5. Increased Machine Reliability**
- 6. Ink Use is reduced**

## Selection of raw materials

**When making duplex board paper, it's important to choose raw materials that are compatible with the form, quality, and specifications of duplex board paper demanded by the market.**

**In the production of high-grade duplex board paper, the surface layer is made of bleached chemical wood pulp, while the core and bottom layers are made of sulphate wood pulp, mechanical wood pulp, high-quality waste paper, and so on. In the production of lower-grade duplex board paper, the surface layer is made of bleached chemical wood pulp or fine white waste paper, while the core and bottom layers are made of waste paper pulp.**

# Market Outlook

**The demand for duplex board is expected to expand at a pace of 10.4 percent. Duplex board is used for a broad range of applications, including box construction, cardboard layers, and folding carton boards for high-end packaging divisions. Due to the wide range of applications, the duplex board market is projected to grow from 2020 to 2027.**

**The packaging industry has a major impact on the global demand for Duplex board. Paper packaging products offer an environmentally safe and biodegradable alternative for packaging companies. During the forecast era, the duplex board market is expected to be driven by an increase in demand for the e-commerce industry. Because of the high number of cardboard boxes used in the distribution process.**

**The duplex board market is expected to be driven by the optimistic outlook for the retail industry. During the forecast era, the Asia Pacific duplex board is expected to expand. It's because emerging economies like India and China are seeing a rise in demand for environmentally friendly goods.**

**The global duplex board market is mainly driven by growth in the food and beverage and electronics industries, with future demand projected to be driven by growth in the household care and personal care products markets. Furthermore, the growth of the duplex board market is fueled by growing ecommerce, as well as increased demand and spending for packaged goods.**

# Reasons for Buying our Report:

- ❖ **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- ❖ **This report provides vital information on the product like it's characteristics and segmentation**
- ❖ **This report helps you market and place the product correctly by identifying the target customer group of the product**

- ❖ **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- ❖ **The report provides a glimpse of government regulations applicable on the industry**
- ❖ **The report provides forecasts of key parameters which helps anticipate the industry performance and make sound business decisions**

# Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

# Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Duplex Paper Board.” provides an insight into Duplex Paper Board market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Duplex Paper Board project. The report assesses the market sizing and growth of the Indian Duplex Paper Board Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Duplex Paper Board sector in India along with its business prospects. Through this report we have identified Duplex Paper Board project as a lucrative investment avenue.
