

Startup Business Plans of
Disposabile Plastic Syringes,
Used and Waste Oil Recycling Plant,
Chlorinated Polyvinyl Chloride,
Gourmet Popcorns, Camphor Powder,
Meat Analogue, HDPE and PP Bags,
Surgical Latex and Nitrile Gloves

Best startup business ideas means a lot to your startup business growth. People today follow their dreams and choose their passion over money. They are always in search of best startup business ideas which can feed their passion. Product manufacturing is an evergreen business globally. And this is one of the most lucrative sector revenue-wise. Here we put a list of few most profitable manufacturing Businesses you can start on your own.

Projects: - [Project Reports & Profiles](#)

Manufacturing business has always been a lucrative field for the people globally. Initially it demands reasonable investment but once it is established it fetches heavy consistent profits. However selecting a good manufacturing business idea is key for the success of the business. There are various manufacturing business ideas across the world where one can start. Best startup business ideas means a lot to your startup business growth. People today follow their dreams and choose their passion over money. They are always in search of best startup business ideas which can feed their passion.

Related Books: - [BOOKS & DATABASES](#)

Manufacturing of Surgical (Surgeons) Latex and Nitrile (NBR-Nitrile Butadiene Rubber) Gloves.

NBR latex may be a synthetic milky colored latex that's widely utilized in dripping rubber for laboratory and medical gloves. These latexes possess excellent properties such as lastingness and oil resistance among others which makes them highly desirable within the healthcare industry. These excellent properties also will help to drive the demand for NBR latex gloves within the food and industrial applications. A surgical (surgeon's) glove is made of natural or synthetic rubber intended to be worn by operating theatre personnel to safeguard a surgical wound from contamination. Surgical gloves have more precise sizing (numbered sizing, generally from size 5.5 to size 9), and are made to higher specifications. They're hand specific. Due to the increasing rate of latex allergy among health professionals also as within the general population, there has been an increasing move to gloves made up of non-latex materials such as vinyl or nitrile rubber.

Related Projects: - [Surgical, Medical Plastics, Medical Disposables, Disposable Medical Products](#)

However, these gloves haven't yet replaced latex gloves in surgical procedures, as gloves manufactured from alternate materials generally don't fully match the fine control or greater sensitivity to the touch available with latex surgical gloves. Nitrile gloves are a type of disposable gloves made from synthetic rubber this means there is no risk of latex allergies. They are the most popular gloves type in our range and offer superior strength, dexterity and resistance to oils and aqueous chemicals in comparison to vinyl or latex. For these reasons, they are often used in the medical, laboratory and manufacturing industries. India disposable gloves market generated \$303 million in 2017, and is projected to reach \$760 million by 2025, growing at a CAGR of 12.4% from 2018 to 2025. In terms of volume, the market is growing at a CAGR of 8.3% from 2018 to 2025.

Related Books: - [Disposable Products \(Medical, Surgical, Thermocol, Plastic, Paper, Domestic and General Products\)](#)

The Indian marketplace for medical gloves remains evolving. While the worldwide market is growing at a compound annual rate of growth (CAGR) of two per cent, the Indian market is at seven per cent growth. Each day there is a replacement hospital or home doping up in India, therefore the demand for medical gloves is predicted to increase. Medical tourism is additionally driving the expansion of this product category in our country. The market size therefore only for surgical gloves in India is Rs 300 crore. In sight of all this, there's an honest scope to initiate small-scale rubber gloves manufacturing unit.

The demand for rubber gloves is rapidly increasing on account of rapid industrialization and urbanization of our country currently happening. Several workers within the chemical, electrical and food processing industries use rubber gloves. Similarly, the amount of individuals using gloves for household purposes during handling of detergents, floor polishes, and pesticides and therefore the like is additionally increasing especially within the urban areas.

Used and Waste Oil Recycling Plant

Re-refining of used lube oil is an economically attractive recycling method in terms of resources conservation and environment protection. It allows processing of hazardous material during a secure and effective thanks to recover a high quality base oil product. Waste oil is generated from industrial and non-industrial sources and primarily contains hydrocarbons. It's getting to also contain additives and impurities due to physical contamination and chemical reactions occurring during its use. Used oil has been used previously, and as a results of that, is now contaminated by impurities, either chemical or physical. Samples of used oil are old transmission oil, motor oil, brake fluid, hydraulic oil and gearbox oil. Used oil could also be a recyclable commodity, and intrinsically, are often stored for recycling, reuse or disposal. Used oil isn't considered to be a waste product.

Related Projects: - [Waste Management and Recycling, Industrial Waste Management](#)

The global lubricants market size was valued at USD 126.5 billion in 2019 and is expected to grow at a compound annual growth rate (CAGR) of 3.6% from 2020 to 2027. The global manufacturing sector has a direct impact on the lubricants demand as they are used in numerous industries including paper and mill, metal forming, foundry, mining, quarrying, energy, plastics, food and beverages, and machining.

The enhanced properties of drugs oils are required to enhance the efficiency of the wind turbine; hence there is an increasing demand for synthetic gear oils in wind turbines. Power generation from wind energy is rising at a swift speed that's also demanding for installation of wind turbines. Wind turbines are fueling the demand for gear oils that are driving the Indian industrial lubricants market.

Related Books: - [Waste Management, Waste Disposal and Recycling Industry](#)

Manufacturing of CPVC (Chlorinated Polyvinyl Chloride)

Chlorinated polyvinyl chloride (CPVC) may be a thermoplastic produced by chlorination of polyvinyl chloride (PVC) resin, which is significantly more flexible and may withstand higher temperatures than standard PVC. Uses include hot and cold water delivery pipes and industrial liquid handling. CPVC, as PVC, is deemed safe for the transport and use of potable water, potable meaning water used for drinking, cooking, and bathing.

The demand for PVC in India witnessed a strong CAGR within the historic years and is projected to realize a healthy CAGR of over 6.81% during 2015-2030. The whole capacity of PVC in India is around 1640 KTA with Reliance Industries holding maximum share in its production as compared to the other four leading players. The domestic production of PVC is unable to consolidate the large demand for the merchandise hence; around 50 per cent of the demand in India is being met through imports.

Related Projects: - [Chemicals \(Organic, Inorganic, Industrial\) Projects](#)

CPVC Applications

- ❖ Hot- and cold-water plumbing distribution, residential and commercial
- ❖ Fire protection: One- and Two-Family Dwellings and Manufactured Homes (NFPA 13D), Low-Rise Residential Occupancies (NFPA 13R) and Light Hazard Occupancies (NFPA 13)
- ❖ Reclaimed water piping (purple pipe)
- ❖ Chilled water piping
- ❖ Hydronic piping and distribution (radiators, fan coils, etc.)
- ❖ Suitable for many industrial and process piping applications

However, chlorinated polyvinyl chloride products turns brittle after a short time due to continuous exposure to hydrocarbon chemicals or losing the molecular bond in CPVC materials. It's getting to create hassles for the merchandise manufacturer. Additionally, there's problem of high maintenance of fabric in leak damage situations, which tends to affect product demand. This might play a setback for product demand over the forecast timeframe.

Related Books: - [Chemical Technology \(Organic, Inorganic, Industrial\), Fine Chemicals](#)

[Production of Gourmet Popcorns \(Popped Corn, Popcorns or Pop-Corn\)](#)

Gourmet Popcorn is extremely popular these days. Number of people's don't conscious of what gourmet popcorn is. Will discuss below how gourmet popcorn is different from other platform. Popcorn is formed up special sort of corn i.e. corn Evert from which tasty popcorn is produced which everyone like to have. It's very healthy food to eat all the age people love to eat popcorn. It's extremely solid sustenance to eat all the age individuals like to eat popcorn. The rationale popcorn 'pops' may be a results of a better than ordinary dampness content inside the portion, and a harder than typical bit, or shell, encompassing that dampness.

Related Projects: - [Food Processing and Agriculture Based Projects](#)

Popcorn could also be a variety of corn kernel which expands and puffs up when heated the same names are also wont to discuss with the foodstuff produced by the expansion. A popcorn kernels strong hull contains the seed's hard, starchy shell endosperm with 14–20% moisture, which turns to steam because the kernel is heated. Pressure from the steam continues to form until the hull ruptures, allowing the kernel to forcefully expand, from 20 to 50 times its original size, then cool. Popcorn is one in every of the six major kinds of corn, which incorporates dent corn, flint corn, pod corn, soft corn , and sweet corn. Each kernel of popcorn contains a specific amount of moisture and oil. Unlike most other grains, the outer hull of the popcorn kernel is both strong and impervious to moisture and thus the starch inside consists almost entirely of a tough type. The global popcorn market is projected to reach \$15billion by 2023, registering a CAGR of 7.6 percent from 2017 to 2023, with ready-to-eat leading the segment. While established FMCG businesses have either launched a popcorn product or are looking to launch one, startups too have built ready-to-eat or ready-to-cook popcorn brands within the domain. It might be futile to undermine the potential this industry has.

Related Books: - [Food Processing, Food Industry, Agriculture, Agro Processing](#)

The future of India Snacks Market are often judged from the very fact that this industry is expected to grow with integer CAGR for the time-frame of 2018 to 2024. India snacks market is dived between organized players and unorganized market. At the present Unorganized market is dominating the India snacks market. But this scenario is predicted to vary during the forecast period of 2018-2024. India Snacks Market is growing because of following factors Lifestyle Changes, Rising Urbanization, Growing middle class Population, Local Availability and Availability of Snacks in Small Package Size, Low Price and Company's Strategies to specialize in regional taste.

Related Videos: - [Food Processing](#)

Camphor Powder (Kapoor/ Kapur) Making Business Plan

Camphor (Cinnamomum camphor) may be a white, crystalline substance with a strong odor and pungent taste, derived from the wood of camphor laurel (Cinnamomum camphor) and other related trees of family Lauraceous. Camphor tree is native to China, India, Mongolia, Japan and Taiwan and a selection of this fragrant evergreen tree is grown in Southern United States; Especially in Florida. Camphor is obtained through steam distillation, purification and sublimation of wood, twigs and bark of the tree. There are many pharmaceutical applications for camphor like topical analgesic, antiseptic, antispasmodic, antipruritic, anti-inflammatory, anti-infective, rubefacient, contraceptive, mild expectorant, decongestant, cough suppressant, etc. Camphor is certainly absorbed through the skin and should even be administered by injection, inhalation and ingestion.

Related Projects: - [Herbs and Herbal Based Products, Ayurvedic Medicines](#)

Global camphor market is anticipated to grow at a CAGR of 7.9% over the forecast period. Factor such as the growing demand of the camphor in making medicine for various sort of diseases is predicted to drive the growth of the camphor market in upcoming years. Because of good chemical properties it's wide selection of application in various user industries such as pharmaceuticals, food, agriculture and chemical among several others. It's also used for creating ointments with vapor for treating cough and chest congestion. Rising demand of camphor for the ointments is anticipated to drive the expansion for the market.

Related Books: - [Herbal Products, Aromatic Plant Cultivation, Processing](#)

Camphor are witnessed to experience high demand from various end-users within the global market. Due to the advantages provided by camphor for various applications has led to high demand for camphor within the market. Camphor provides high medicinal benefits such as pain and swelling reduction, relief from congestion and cough, relieves wiped out muscles, sprains, etc. Camphor is additionally utilized in manufacturing wide selection of Ayurvedic medicines. Growing demand from the pharmaceutical industry has therefore led to high demand for camphor within the market.

Plant-Based Meat Alternatives -Meat Analogue, Vegan Meat & Mock

Meat Manufacturing from Soyabean and Wheat Gluten

A meat analogue may be a meat-like substance made up of plants. More common terms are plant-based meat, vegan meat, meat substitute, mock meat, meat alternative, imitation meat, or vegetarian meat, or, sometimes more pejoratively, fake meat or faux meat. Meat analogues typically approximate certain aesthetic qualities (such as texture, flavor, and appearance) or chemical characteristics of specific varieties of meat. Generally, meat analogue means a food made up of vegetarian ingredients, and sometimes without animal products such as dairy. Many analogues are soy-based (e.g. tofu, tempeh) or gluten-based, but now can also be made up of pea protein. Other less common analogues include ingredients like mycoprotein.

Related Projects: - [Meat, Chicken, Egg, Pork, Fish Processing, Marine Products, Seafood Processing Projects](#)

A meat analogue, also mentioned as a meat alternative or substitute, or as mock, imitation, vegetarian, or vegan meat, approximates certain aesthetic qualities (such as texture, flavor, and appearance) or chemical characteristics of specific varieties of meat. Generally, meat analogue means a food made from vegetarian ingredients, and sometimes without animal products such as dairy. Many analogues are soy-based (e.g. tofu, tempeh) or gluten-based, but now also can be made from pea protein. The target market for meat analogues includes vegetarians, vegans, non-vegetarians seeking to reduce their meat consumption, and people following religious dietary laws in Hinduism, Judaism, Islam, and Buddhism. Increasingly the global demand for sustainable diets in response to the outsized role animal products play in global warming and other environmental impacts has seen an increase in industries focused on finding substitutes similar to meat. There has been an increased leaning towards non-meat based protein alternatives.

Related Books: - [Livestock Farming, Development \(Sheep, Pig, Goat, Rabbit\), Poultry Farming](#)

International players such as Impossible Foods and Beyond Meat which offer substitute products for meat have been doing brisk business. In fact, reports predict that the global meat substitute market size which was valued at \$4.1 billion in 2017 is expected to scale up to \$8.1 billion by 2026.

India meat substitutes market is predicted to grow at a CAGR of on the brink of 10% during the forecast period. The India meat substitutes market is driven by rising health concerns including growing awareness about various diseases caused because of lack of proteins among consumers. Also, increasing vegan population in India is predicted to bolster the expansion of market over following few years. Growing demand for plant-based meat products among the population is further aiding the expansion of India meat substitutes market over the approaching years.

Market Research :- [Market Research Report](#)

Manufacturing of High Density Poly Ethylene (HDPE) and Polypropylene (PP) Bags

High-density polyethylene (HDPE) or polyethylene high-density (PEHD) is a thermoplastic polymer produced from the monomer ethylene. It is sometimes called "alkathene" or "polythene" when used for HDPE pipes. With a high strength-to-density ratio, HDPE is used in the production of plastic bottles, corrosion-resistant piping, geomembranes and plastic lumber. HDPE is commonly recycled, and has the number "2" as its resin identification code.

The global HDPE market reached a volume of more than 30 million tons. At the present there's underutilization of existing capacity due to marketing problems after introducing of Jute packaging Mandatory Order 1986. The demand for woven sacks was sluggish for a variety of reasons.

Related Projects:- [Business Ideas after the Covid Breakdown](#)

A few of year's back Flat looms were used for the manufacture of woven sacks. Now it has been manufactured on circular looms, which have high productivity. This helped in minimizing the worth of production; however due to high cost of jute bags & also due to resistance to chemicals, moisture etc. most of industry prefer HDPE/PP woven sacks for packaging.

Related Projects: - [Packaging Industry, Beverage Can, Bottles, Blister Packs, Carton, Bags](#)

Lighter in weight & have more advantages than conventional bags. PP/HDPE woven sacks laminated with LDPE/PP liner have wider applications. HDPE woven sacks are much stronger & can withstand much higher impact loads because of HDPE strips elongation at break is about 15-25% as compared to 30% of Jute. These sacks are much cleaner & resist fungal attack. Jute prices are very unstable within the market since Jute is an agriculture product. These sacks have many advantages over other conventional sacks materials & are quite competitive in price. Woven Packaging Fabrics, Woven bags and fabrics are often used as an industrial packaging material.

The packaging bags and fabrics are available mostly in HDPE (High Density Polythene) and PP (Polypropylene). Counting on end use these are either laminated, or supplied without lamination.

Based on material type, the worldwide plastic bags and sacks market is segmented into biodegradable and non-biodegradable. The biodegradable segment is further segmented into poly lactic acid (PLA), poly-hydroxyl-alkanets (PHA), and starch blend resins, while the non-biodegradable segment is further segmented into density polyethylene (LDPE), high density polyethylene (HDPE), polypropylene (PP), linear rarity polyethylene (LLDPE), and polystyrene (PS). Changes in consumer lifestyle, rapid pace of industrialization, rising commodity and retail sector, and declining prices of oil and gas in emerging markets are the factors accentuating market growth. The worldwide marketplace for plastic bags and sacks is forecast to expand at a CAGR of over 3.4% from 2016 to 2024.

Related Books: - [Packaging Industry, Beverage Can, Bottles, Blister Packs, Carton, Bags, Plastic Bottles](#)

[Start a Disposable Plastic Syringes Manufacturing Business](#)

Plastics are finding greater use in medical disposables and replacing conventional materials like metals and glass. One such application which has been established within the country is that the use of disposable syringes produced from polypropylene resin by the process of injection molding. The components include the plunger, main body which is graduated to point capacity, gasket, needle holder and therefore the sheath protect the needle. The individual syringes are over wrapped during a polyethylene film pouch for subsequent sterilization by ethylene oxide/gamma radiation. Disposable Syringes are made up of plastic material and are utilized within the sector of medical and veterinary science. Due to their availability in sterilized condition, ready to use, and price effectiveness, disposable syringes are fast replacing the age-old glass syringes.

Related Projects: - [Disposable Products and Projects from Paper, Plastic, Thermocol, Banana Leaves](#)

The constantly increasing use of this type Syringe indicates its importance which is predicated mainly on the advantages it offers regarding cost and hygienic applications. The manufacture of plastic syringes has been developed to such a degree that the products now satisfy the wants and standards set by Hospital and physicians.

At the same time they provide the foremost effective possible technique of application to the physician and thus the very best possible degree of safety to the patient. Disposable syringes commonly are utilized in modern medicine for the injection of medication and vaccines or for the extraction of blood. The usually are used rather than reusable syringes in an attempt to avoid spreading a disease. Among the common uses of disposable syringes are the injecting of insulin by a diabetic person and therefore the administering of an area anesthesia by a dentist. In medical industries syringes are very important and play a significant role. It's a medical device which is used to inject or withdraw fluids from the body.

Related Videos: - [Disposable Product](#)

Numerous categories of syringes are employed by medical examiners counting on the situations. The aim behind using syringes is to wash wounds by infusing fluids into body. Syringes are used for distillation of blood, for vaccination, for infusing of insulin, for governing anesthesia etc.

Related Books: - [Disposable Products \(Medical, Surgical, Thermocol, Plastic, Paper, Domestic and General Products\)](#)

The market of medical disposables holds the revenue of roughly USD 225 billion in 2016 at a CAGR of around 7% over the forecast period i.e. 2016-2024 during which global syringes market accounted for USD 5 billion in 2016 because of increasing number of chronic diseases so on. On the basis of products disposable syringes are the dominating market with a CAGR of around 6% over the forecast period i.e. 2016-2024 because disposable syringes are used only once ensuring the safety of patients. On the basis of material, glass syringe is dominating the segment and is expected to reach a value of USD 15 million by 2024 because they can be sterilized and reused. The syringes market is expected to reach USD 15.99 Billion by 2021 from USD 10.56 Billion in 2016, at a CAGR of 8.7% during the forecast period.

Major Queries/Questions Answered in Our Report?

- 1. How has the industry performed so far and how will it perform in the coming years?**
- 2. What is the Project Feasibility of the Plant?**
- 3. What are the requirements of Working Capital for setting up the plant?**
- 4. What is the structure of the industry and who are the key/major players?**

- 5. What is the total project cost for setting up the plant?**
- 6. What are the operating costs for setting up the plant?**
- 7. What are the machinery and equipment requirements for setting up the plant?**
- 8. Who are the Suppliers and Manufacturers of Plant & Machinery for setting up the plant?**
- 9. What are the requirements of raw material for setting up the plant?**

- 10. Who are the Suppliers and Manufacturers of Raw materials for setting up the plant?**
- 11. What is the Manufacturing Process of the plant?**
- 12. What is the total size of land required for setting up the plant?**
- 13. What will be the income and expenditures for the plant?**
- 14. What are the Projected Balance Sheets of the plant?**

- 15. What are the requirement of utilities and overheads for setting up the plant?**
- 16. What is the Built up Area Requirement and cost for setting up the plant?**
- 17. What are the Personnel (Manpower) Requirements for setting up the plant?**
- 18. What are Statistics of Import & Export for the Industry?**
- 19. What is the time required to break-even?**

- 20. What is the Break-Even Analysis of the plant?**
- 21. What are the Project financials of the plant?**
- 22. What are the Profitability Ratios of the plant?**
- 23. What is the Sensitivity Analysis-Price/Volume of the plant?**
- 24. What are the Projected Pay-Back Period and IRR of the plant?**
- 25. What is the Process Flow Sheet Diagram of the plant?**
- 26. What are the Market Opportunities for setting up the plant?**
- 27. What is the Market Study and Assessment for setting up the plant?**
- 28. What is the Plant Layout for setting up the plant?**

Reasons for Buying Our Report:

- **The report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **The report provides vital information on the product like it's characteristics and segmentation**
- **The report helps you market and place the product correctly by identifying the target customer group of the product**

- **The report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

Free Instant Online Project Identification and Selection Service

Our Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify projects based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the projects on the basis of mentioned pointers and identify a suitable project matching your investment requisites.....[Read more](#)

NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our Market Survey cum Detailed Techno Economic Feasibility Report provides an insight of market in India. The report assesses the market sizing and growth of the Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

The detailed project report covers all aspect of business, from analyzing the market, confirming availability of various necessities such as Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule,

Working Capital Requirement, uses and applications, Plant Layout, Project Financials, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis. The DPR (Detailed Project Report) is formulated by highly accomplished and experienced consultants and the market research and analysis are supported by a panel of experts and digitalized data bank.

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in India along with its business prospects.....[Read more](#)

NIIR PROJECT CONSULTANCY SERVICES

AN ISO 9001: 2015 CERTIFIED COMPANY

Who are We?

- *One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services*
- *We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients' in India & abroad*

What do We Offer?

- *Project Identification*
- *Detailed Project Reports/Pre-feasibility Reports*
- *Business Plan*
- *Market Research Reports*
- *Technology Books and Directory*
- *Industry Trend*
- *Databases on CD-ROM*
- *Laboratory Testing Services*
- *Turnkey Project Consultancy/Solutions*
- *Entrepreneur India (An Industrial Monthly Journal)*

How are We Different ?

- *We have two decades long experience in project consultancy and market research field*
- *We empower our customers with the prerequisite know-how to take sound business decisions*
- *We help catalyze business growth by providing distinctive and profound market analysis*
- *We serve a wide array of customers , from individual entrepreneurs to Corporations and Foreign Investors*
- *We use authentic & reliable sources to ensure business precision*

Our Approach

Requirement collection

Thorough analysis of the project

Economic feasibility study of the Project

Market potential survey/research

Report Compilation

Who do we Serve?

- Public-sector Companies
- Corporates
- Government Undertakings
- Individual Entrepreneurs
- NRI's
- Foreign Investors
- Non-profit Organizations, NBFC's
- Educational Institutions
- Embassies & Consulates
- Consultancies
- Industry / trade associations

Sectors We Cover

- Ayurvedic And Herbal Medicines, Herbal Cosmetics
- Alcoholic And Non Alcoholic Beverages, Drinks
- Adhesives, Industrial Adhesive, Sealants, Glues, Gum & Resin
- Activated Carbon & Activated Charcoal
- Aluminium And Aluminium Extrusion Profiles & Sections,
- Bio-fertilizers And Biotechnology
- Breakfast Snacks And Cereal Food
- Bicycle Tyres & Tubes, Bicycle Parts, Bicycle Assembling

Sectors We Cover *Cont...*

- Bamboo And Cane Based Projects
- Building Materials And Construction Projects
- Biodegradable & Bioplastic Based Projects
- Chemicals (Organic And Inorganic)
- Confectionery, Bakery/Baking And Other Food
- Cereal Processing
- Coconut And Coconut Based Products
- Cold Storage For Fruits & Vegetables
- Coal & Coal Byproduct

Sectors We Cover *Cont...*

- Copper & Copper Based Projects
- Dairy/Milk Processing
- Disinfectants, Pesticides, Insecticides, Mosquito Repellents,
- Electrical, Electronic And Computer based Projects
- Essential Oils, Oils & Fats And Allied
- Engineering Goods
- Fibre Glass & Float Glass
- Fast Moving Consumer Goods
- Food, Bakery, Agro Processing

Sectors We Cover *Cont...*

- Fruits & Vegetables Processing
- Ferro Alloys Based Projects
- Fertilizers & Biofertilizers
- Ginger & Ginger Based Projects
- Herbs And Medicinal Cultivation And Jatropha (Biofuel)
- Hotel & Hospitality Projects
- Hospital Based Projects
- Herbal Based Projects
- Inks, Stationery And Export Industries

Sectors We Cover

Cont...

- Infrastructure Projects
- Jute & Jute Based Products
- Leather And Leather Based Projects
- Leisure & Entertainment Based Projects
- Livestock Farming Of Birds & Animals
- Minerals And Minerals
- Maize Processing(Wet Milling) & Maize Based Projects
- Medical Plastics, Disposables Plastic Syringe, Blood Bags
- Organic Farming, Neem Products Etc.

Sectors We Cover *Cont...*

- Paints, Pigments, Varnish & Lacquer
- Paper And Paper Board, Paper Recycling Projects
- Printing Inks
- Packaging Based Projects
- Perfumes, Cosmetics And Flavours
- Power Generation Based Projects & Renewable Energy Based Projects
- Pharmaceuticals And Drugs
- Plantations, Farming And Cultivations
- Plastic Film, Plastic Waste And Plastic Compounds
- Plastic, PVC, PET, HDPE, LDPE Etc.

Sectors We Cover *Cont...*

- Potato And Potato Based Projects
- Printing And Packaging
- Real Estate, Leisure And Hospitality
- Rubber And Rubber Products
- Soaps And Detergents
- Stationary Products
- Spices And Snacks Food
- Steel & Steel Products
- Textile Auxiliary And Chemicals

Sectors We Cover *Cont...*

- Township & Residential Complex
- Textiles And Readymade Garments
- Waste Management & Recycling
- Wood & Wood Products
- Water Industry(Packaged Drinking Water & Mineral Water)
- Wire & Cable

MARKET RESEARCH REPORTS

Objective

- ⌘ To get a detailed scenario of the industry along with its structure and classification
- ⌘ To provide a comprehensive analysis of the industry by covering aspects like:
 - ⌘ Growth drivers of the industry
 - ⌘ Latest market trends
 - ⌘ Insights on regulatory framework
 - ⌘ SWOT Analysis
 - ⌘ Demand-Supply Situation
 - ⌘ Foreign Trade
 - ⌘ Porters 5 Forces Analysis

Objective

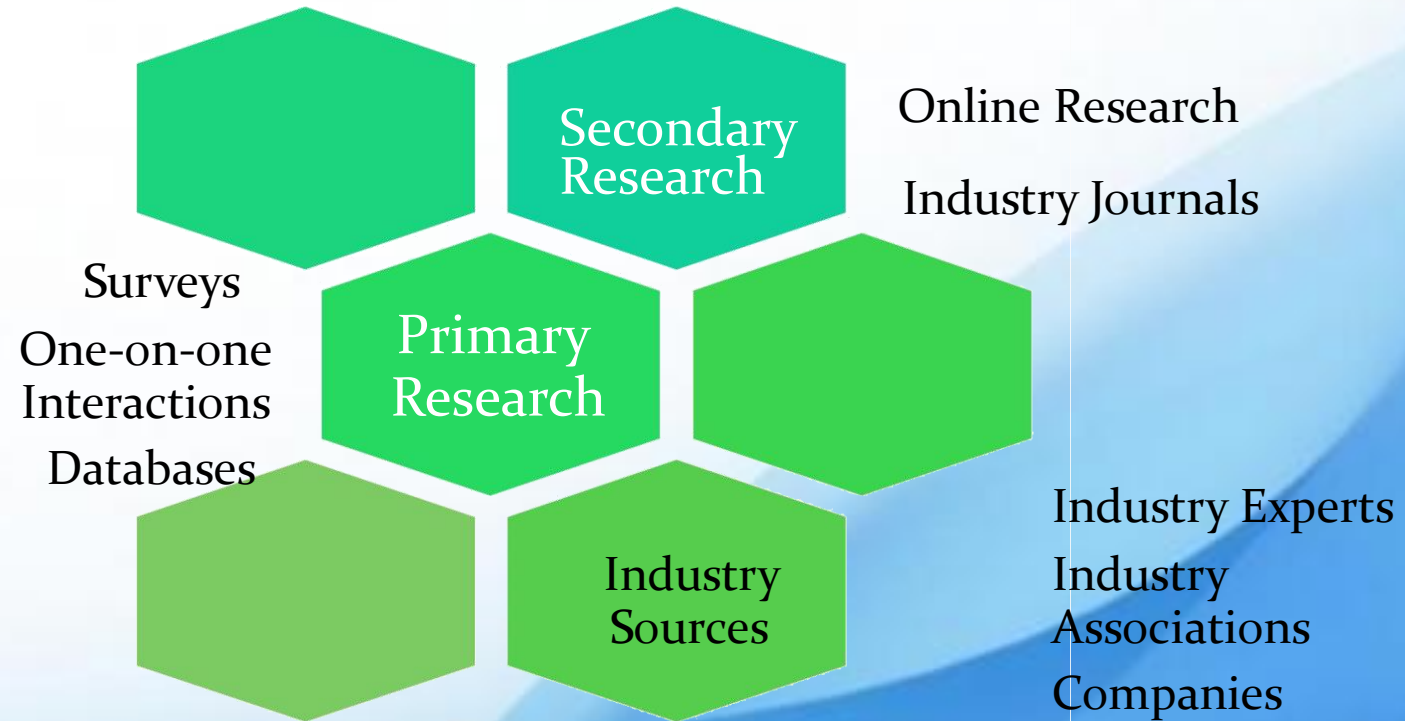

- ∞ To provide forecasts of key parameters which helps to anticipate the industry performance
- ∞ To help chart growth trajectory of a business by detailing the factors that affect the industry growth
- ∞ To help an entrepreneur/manager in keeping abreast with the changes in the industry
