

Top Small, Medium Scale Business
Ideas List for Beginners,
Start -Up Projects for Entrepreneurs

(NPCS Newsletter - Issue 082017)

The only way to determine if your ideas can potentially be profitable as a business and is worth pursuing further is to conduct feasibility studies. The purpose each entrepreneur should conduct a detailed feasibility assessment or study is to test if that business idea makes: Personal Sense, Business Sense, Market Sense, and Financial Sense. Without looking at the personal aspect, business concept, the market, and the financials, as well as analyzing the data and information, an entrepreneur is likely not to be successful or not as successful as s/he would like to be.

A business plan is an essential roadmap for business success. A business plan provides direction, keeps you on track and is usually a requirement when you seek finance. A business plan is a formal grid map of all of your business goals, and plans on how to achieve them. Entrepreneurial skills assist Small scale industries generate growth and development of new ventures in developing economies. At the entrepreneurship development level, a key role of the programme is to develop tools and programmes that deal with the long term effects of entrepreneurial culture.

We believe that preparing a business plan is important for any business regardless of its size or nature. To make it easier here are few project profiles for planning a business:

Detailed Project Report On Dehydrated Onion

Onion is one of the most important commercial vegetable crops grown in India. It contains vitamin B and a trace of vitamin C and also traces of iron and calcium. All onions for processing are grown from specific varieties best suited for dehydration. The main advantages of dehydrated onions are that they are easy to store, being lighter in weight and smaller in bulk than fresh or other processed onions. They are cheap to pack compared with canned goods. There are different types of dehydrated onion in the market.

Electric Motors

An electric motor is a device converting electrical energy into mechanical energy (usually a torque). This conversion is usually obtained through the generation of a magnetic field by means of a current flowing into one or more coils. An electric motor turns because of magnetic force exerted between a stationary electromagnet called the stator and a rotating electromagnet called the rotor. Different types of electric motors are distinguished by how electric current is supplied to the moving rotor.

Detailed Project Report On
Essential Oil Extraction
(Jasmine and Tuberose)

Essential oils, also called volatile odoriferous oil, are aromatic oily liquids extracted from different parts of plants, for example, leaves, peels, barks, flowers, buds, seeds, and so on. They can be extracted from plant materials by several methods, steam distillation, expression, and so on. Jasmine essential oil has a sweet and floral aroma. Jasmine is sought after for its powerful characteristics that aid the body as an anti-depressant, an aphrodisiac, and its confidence boosting qualities it has on the mind.

Virgin Coconut Oil

Virgin coconut oil (VCO) is the purest form of coconut oil. Introduced onto the world market at the end of the 20th century, it is one of the highest value products derived from the fresh coconut. It is growing in popularity as functional food oil and the public awareness of it is increasing. It is the oil obtained from the fresh and mature kernel of coconut by mechanical or natural means, with or without the use of heat, without undergoing chemical refining, bleaching or deodorizing, and which does not lead to the alteration of the nature of the oil.

Detailed Project Report On
Synthetic Red Iron Oxide

Iron oxides are chemical compounds composed of iron and oxygen. All together, there are sixteen known iron oxides and oxyhydroxides. Iron oxides are widely used as inexpensive, durable pigments in paints, coatings and colored concretes. Colors commonly available are in the "earthy" end of the yellow/orange/red/brown/black range. Synthetic Iron Oxides have become increasingly important due to their pure hue, consistent properties, and tinting strength.

**Macaroni, Vermicelli, Noodles and Instant Noodles with
Tastemaker**

Extrusion-technology is gaining increasing popularity in the global agro-food processing industry, particularly in the food and feed sectors. Extrusion cooking technologies are used for cereal and protein processing in food. Noodles and macaroni are a form of pasta that is becoming extremely popular in India even as Continental and Italian delicacy. Instant Noodles, macaroni and vermicelli is prepared by means of an extrusion machine that is basically made of an stainless steel make strips, either flat (rolled and Cut) or Oval round (Extruded).

Detailed Project Report On
Dish Wash (Liquid & Soap Bar)
and Detergent (Liquid Soap Bar and Powder)

Detergents are defined as complete washing or cleaning products, which contain among their ingredients an organic surface-active compound (Surfactant) that passes soil-removal properties. Frequently the term detergent is used synonymously with surfactant but common industry practice treats the surfactant as one component of a done here. Detergent cake, detergent powder and liquid detergent are largely used in the domestic houses, commercial sectors, hotel industries, garment industries and in many other sections of the society

Phenolic Foam

Phenolic foam is a dense, lightweight and porous material that can be cut into virtually any shape. It holds its shape when wet and provides both water and support to cut flower arrangements. Phenolic foam originally appeared as a green brick. Today, it comes in various colors and a variety of shapes such as spheres, crosses or wreaths suitable for a variety of arranging needs. In addition, phenolic foam is pH balanced.

Dal Mill

(Pulse)

India is the still by and large vegetarian in dietary habit and heavily depends upon vegetative source to meet out its daily protein requirement. India is bound to be global leader in terms of production and consumer of pulses. Since, India is leading importer of pulses; production of pulse/legume crops has been stagnant over the years.

They are the main sources of protein. The important dals in the country are Channa, Moong, Urad, Moth, turdal and Masoor, Matar etc.

Detailed Project Report On Porcelain Insulator

Electricity play a vital role in the development and growth of Agriculture and Industry, as it is a high priority item for all the developing or developed nations. For the generation and distribution of Electricity, High Tension Insulators are an important adjusts. Insulators have very few free electrons and do not transfer electrical energy well. An electrical insulator is a material whose internal electric charges do not flow freely, and therefore make it nearly impossible to conduct an electric current under the influence of an electric field.

Detailed Project Report On
Curcumin Extraction Unit

Curcumin is the main biologically active phytochemical compound of Turmeric. It is extracted, concentrated, standardized and researched. Curcumin is a water-soluble orange-yellow coloured powder. Today, India is the primary exporter of turmeric (known as haldi in India). Curcumin is one of three curcuminoids of turmeric. The other two curcuminoids are demethoxycurcumin and bisdemethoxy curcumin. Curcumin is widely used to colour many foods.

Detailed Project Report On
Readymade Garments
(E.O.U.)

Readymade garments are a part of our daily life. Clothes are an epitome of a culture. People in different parts of the world have their own styles of dressing which symbolize their culture and status. The Readymade garments industry is increasing day by day due to changes of fashion in day to day life. The textile industry including readymade garments occupies a unique position in the Indian economy.

Detailed Project Report On
Non-Formaldehyde Dye Fixing Agent
for Reactive Dyes

Dyes and pigments are the most important colorants used to add a color or to change the color of something. They are widely used in the textile, pharmaceutical, food, cosmetics, plastics, paint, ink, photographic and paper industries. Dyes are colored substances which are soluble or go into solution during the application process and impart color by selective absorption of light.

5 Star Hotel

A hospitality unit such as a restaurant, hotel, or an amusement park consists of multiple groups such as facility maintenance and direct operations (servers, housekeepers, porters, kitchen workers, bartenders, management, marketing, and human resources etc.). A hotel is an establishment that provides lodging paid on a short-term basis. Hotel operations vary in size, function, and cost. Most hotels and major hospitality companies have set industry standards to classify hotel types.

Mango Pickles

Pickle is a general term used for fruits or vegetables preserved in vinegar or brine, usually with spices or sugar or both. Pickle producing businesses are engaged in producing pickle in different varieties. Natural fruit and vegetable items are used as raw material for producing various types of pickles i.e. mango, beet, cabbage, cauliflower etc.

Pickling is one of the oldest methods of food preservation. Indian pickles play an important role in fruit and vegetable preservation industry.

Detailed Project Report On
Mosquito Repellent Liquidator

The mosquito repellent consists of a liquid mix that gets converted into vapors on moderate heating. These compounds vaporize without decomposition on heating at temperatures up to 400°C and produce varying repellent action on the mosquitoes, depending on the type of product and species of mosquito. It is largely used in the domestic and in the commercial sector for mosquito repellent.

There is very good market of this type product throughout the year, though there is competition in the market.

Detailed Project Report On Chilli Oil from Red Chilli

Chili is one of the abundantly domestically used as well as commercially used spices. Chili can be commercially exploited for extraction of chili oil and oleoresin afterwards it can be ground in Chili powders as used ground chili spices. For extraction of chili oil and oleoresin, there will be use of solvent extraction process or steam distillation process.

Chili oil is an infusion of chili peppers in a base oil like sesame oil. It is a condiment commonly used in Chinese and Korean cuisine.
