

Wire Nails Manufacturing Business.

How to Start Nail Factory.

Profitable Small Business Ideas

in India

Introduction

Nails are pin-shaped, sharp objects of hard metal or alloy used as fasteners. They are typically made of steel, often dipped or coated to prevent corrosion in harsh conditions or improve adhesion. This also helps to add to its aesthetics (decorative appearance) in addition to improving the gripping strength. Ordinary nails for wood are usually of soft, low carbon or mild steel while those for concrete are harder.

Nails are driven into the work piece by a hammer, nail gun or an explosive charge and they hold materials together by friction in the axial direction and shear strength. Nails are used for various purposes and industries ranging from building and construction to carpentry. It is for this reason that the types of nails are many and varied.

Wire nail is very well known item, as it is very common product, which is normally used in daily life. It is used for fastening purpose. Its use is so wide spread that it has become part and parcel of the life.

Wire nails are pin-shaped, sharp objects of hard metal or alloy used as fasteners. They are typically made of steel, often dipped or coated to prevent corrosion in harsh conditions or improve adhesion. Ordinary nails for wood are usually of soft, low carbon or mild steel while those for concrete are harder. Nails are used for various purposes and industries ranging from building and construction to carpentry. There is a tremendous variety of nails, since they are used for so many different purposes.

There had been an erratic growth of the indigenous industry from past years. Since the manufacture of wire nails could be undertaken on a small scale or even on a cottage scale, there is a mushroom growth of nail making units in operation. Future of wire nails will directly depend upon building activity in country. As we know that at present country is facing acute housing problem. So, now government is much emphasising on housing development, which naturally will lead to greater demand of wire nail. Thus, as an entrepreneur this project offers an exciting opportunity to you.

Reasons for Buying our Report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Wire Nail ” provides an insight into the Wire Nail market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Wire Nail project. The report assesses the market sizing and growth of the Indian Wire Nail Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Wire Nail sector in India along with its business prospects. Through this report we have identified Wire Nail project as a lucrative investment avenue.
