

Circular Loom, Woven Sacks, HDPE PP Bag and Fabric Making.

Best Small Business Ideas in India

Introduction

HDPE/PP Woven Fabrics, HDPE/PP Woven Sacks / Bags & Multicolor Printed BOPP Laminated PP Woven Sacks / Bags; these are used in various end applications like Grain & Pulses Bags, Foods & Spices Bags, Animal Food Bags, Fertilizers & Chemical Bags, Cement & Wall finish Bags, Powder & Granule Bags, Mineral Bags, Detergent Bags, Mehndi Bags, Nuts & Fruits Bags, Specialty Bag For Tea & Coffee, Outer Promotional Shopping Bags. These polypropylene (PP) woven fabrics are quality constructed to provide strong and economical packaging option for varied industry sectors.

HDPE PP Woven bags are the traditional bags in packaging industry due to their wide variety of usage, flexibility and strength. They are commonly used for packing fertilizers, feeds, grains, Barley, flour, salt, sugar, seeds, explosive, cement, coal, malt, rubbish and other lumpy and fine materials.

A few years back Flat looms were used for the manufacture of woven sacks. Now it has been manufactured on circular looms, which have high productivity. This helped in minimizing the cost of production; however due to high cost of jute bags & also due to resistance to chemicals. Moisture etc. most of industry prefer HDPE/PP woven sacks for packaging.

Woven fabric is a textile formed by weaving. It is produced on a loom, and made of many threads woven on a warp and a weft. The trend in the various sectors in the textile industry in many industrialized countries indicate that the use of conventional textiles has reached a static level and its manufacture has become highly competitive, often unviable and many companies are switching over to value-added technical textiles with capability to meet functional demands for precision applications. As use of technical textiles is dictated by need, its pricing normally offers good margins. There is a steady growth of both consumption and production of technical textiles throughout the world.

Indian woven sack industry has also been one of the fastest growing segments of the bulk packaging industry and has registered an annual compounded growth rate of 15% or more over the last decade.

There are a little over 30 Indian manufacturers and the present output of the Indian FIBC industry is estimated to be about 125,000 MT per year valued at some Rs. 1,350 crores. The maximum growth potential is seen in the FIBC, woven sacks exports, leno bags & wrapping fabric. Thus, as an entrepreneur this project offers an exciting opportunity to you.

Incremental demand for plastic woven sacks is estimated at 330,000 tonnes, based on estimates from the Food Corporation of India (FCI), the sole government agency for food grain procurement in the country.

Reasons for buying our report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on HDPE / PP Woven Fabric and Sacks” provides an insight into the HDPE / PP Woven Fabric and Sacks market in India with focus on uses and applications, manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of HDPE / PP Woven Fabric and Sacks project. The report assesses the market sizing and growth of the Indian HDPE / PP Woven Fabric and Sacks Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the HDPE / PP Woven Fabric and Sacks sector in India along with its business prospects. Through this report we have identified HDPE / PP Woven Fabric and Sacks project as a lucrative investment avenue.

Free Instant Online Project Identification & Selection Search Facility

Selection process starts with the generation of a product idea. In order to select the most promising project, the entrepreneur needs to generate a few ideas about the possible projects.

Here's we offer a best and easiest way for every entrepreneur to searching criteria of projects on our website www.entrepreneurindia.co that is "[Instant Online Project Identification and Selection](#)"

NPCS Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify projects based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the projects on the basis of mentioned pointers and identify a suitable project matching your investment requisites.
